

# Hybrid Meeting Solutions

## Creating Live Event Experiences for Attendees Wherever They May Be

Although remote attendees often feel excluded from live events, we are pleased to help you provide a unique and valuable experience for all of your stakeholders, whether on-site or miles away. From single-presenter seminars to full-scale panels, your sessions may make use of these solutions to adapt your content for simultaneous consumption by virtual and physical audiences. For quotes or pricing information, please contact your Event Manager. If you don't see what you need, let them know and they'll be happy to tailor a solution to meet your exact requirements.

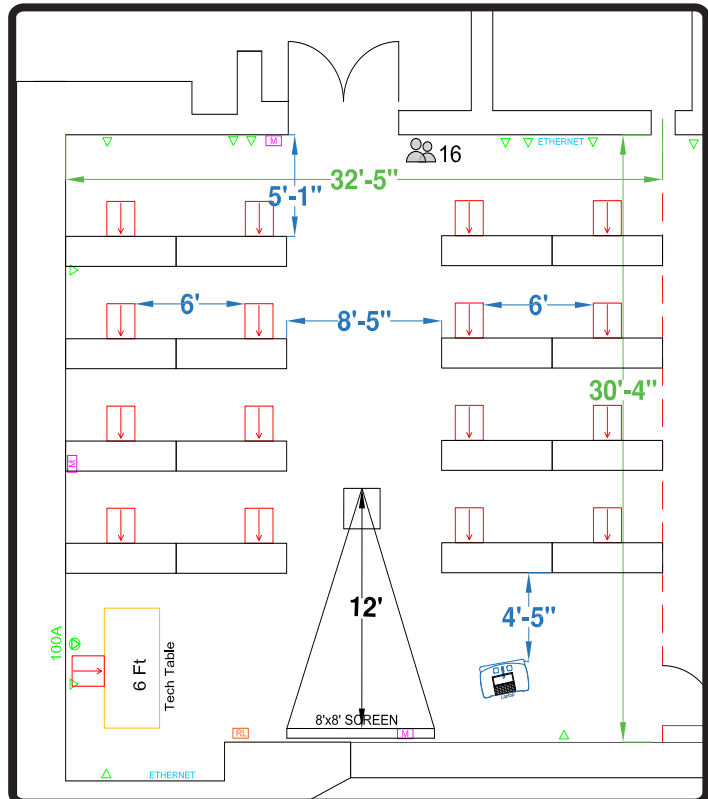

# HYBRID MEETING OPTION

## View Carré

This package works best for a single presenter at a lectern.

- A wired microphone, lectern and laptop with virtual meeting platform software installed will be provided.
- A screen and projector in the room will be provided. Remote attendees will see presentations via the virtual platform.
- The presenter will manage the virtual platform view.
- No external recording services will be provided.

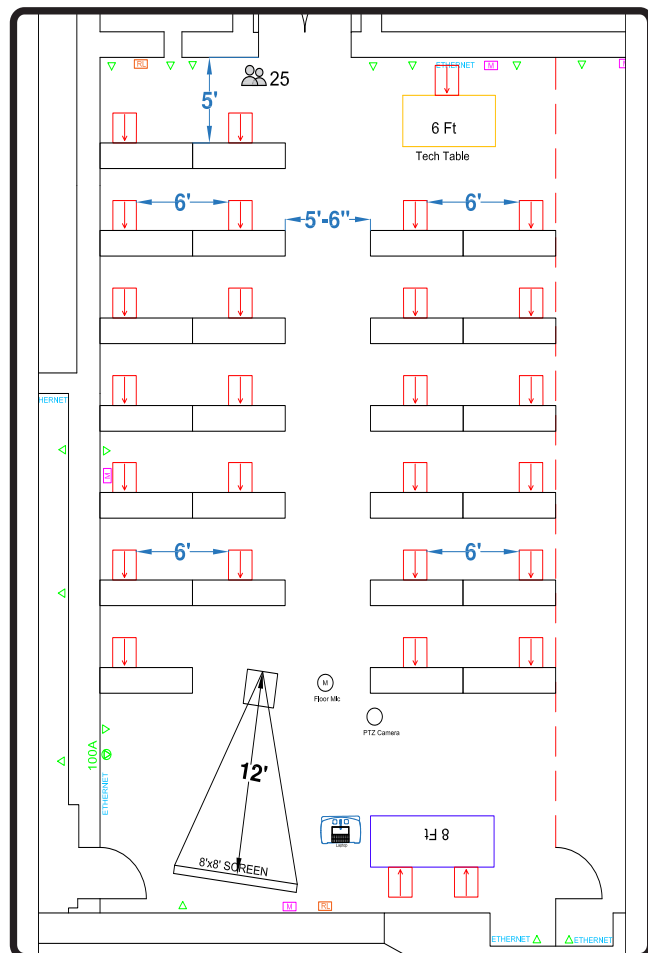

# HYBRID MEETING OPTION

## Faubourg Marigny

This package works best for interactive sessions (including Q&A) with a single presenter.

- A wired microphone, lectern and laptop with virtual meeting platform software installed will be provided.
- A screen and projector in the room will be provided. Remote attendees will see presentations via the virtual platform.
- A microphone for the on-site audience will be provided. Sanitizing wipes will be provided to sterilize this shared microphone after each use.
- Remote presenters and remote audience can interact through the virtual platform.
- Our Production Services will manage the virtual platform.

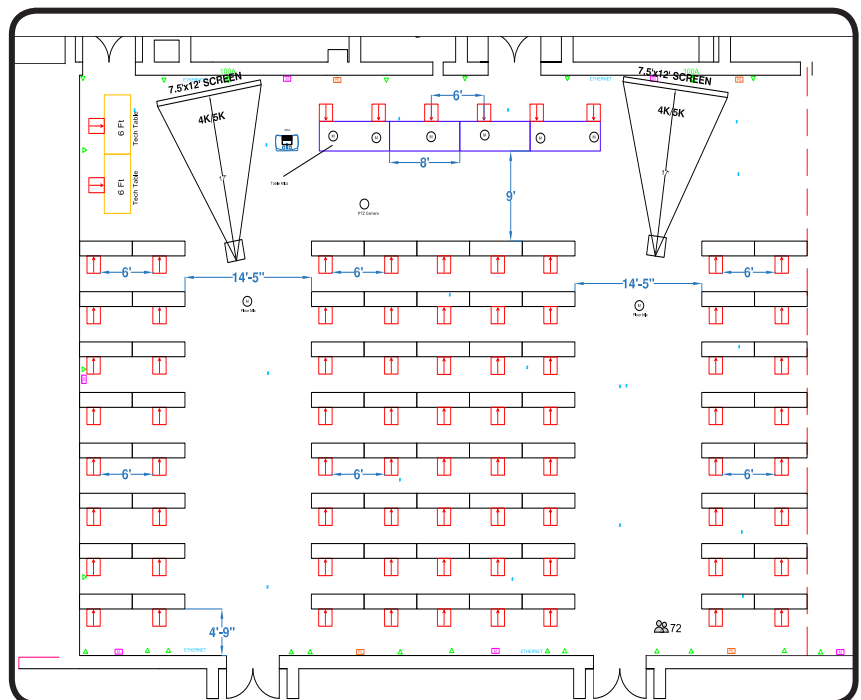

# HYBRID MEETING OPTION

## Gentilly

**This package works best for interactive sessions with a panel discussion and a moderator or presenter at a lectern.**

- A wired microphone, lectern and laptop with virtual meeting platform software installed will be provided.
- A screen and projector in the room will be provided.
- Remote attendees will see presentations via the virtual platform.
- A Pan/Tilt/Zoom (PTZ) camera and operator – in place of the laptop's webcam - will be provided, allowing focus to shift from the presenter at the lectern to head table for demonstrations, panel discussion, and/or on-site audience participation.
- Wired table microphones at the head table for panel discussion will be provided, as well as a microphone for on-site audience participation. Sanitizing wipes will be provided to sterilize this shared microphone after each use.
- Remote presenters and remote audience can interact through the virtual platform.
- Our Production Services will manage the virtual platform.
- Our Production Services will assist presenters with pulling up any of their slides or other media.
- We continue to offer management of overflow rooms to provide additional space for social distancing.
- Our in-house audio system allows us to send audio to and from any space with speakers.
- We have the ability to overflow audio and video to multiple rooms using our in-house IT infrastructure.

# OVERFLOW ROOMS

- We continue to offer management of overflow rooms to provide additional space for social distancing.
- Our in-house audio system allows us to send audio to and from any space with speakers.
- We have the ability to overflow audio and video to multiple rooms using our in-house IT infrastructure.
