# A DIFFERENT VIEW

Every year, four million people visit the Sistine Chapel in Rome to admire the beautiful ceiling frescoes by Michelangelo. In partnership with Visit Baton Rouge, the Raising Cane's River Center will be bringing these masterpieces to Baton Rouge, April 1-30, 2020. MICHELANGELO - A DIFFERENT VIEW offers the unique opportunity to look at his timeless work in a different way.

The sculptor and painter Michelangelo spent four years of his life on scaffolding under the vaulted ceiling of the Sistine Chapel painting probably the most famous frescoes in the world with his interpretation of the history of creation. Prior to this, a simple starry sky had adorned the ceiling of the Sistine Chapel.

Faced by the challenge presented by the structural architecture, he developed outstanding painting techniques, setting new standards for future generations of painters – up to the present day.

MICHELANGELO - A DIFFERENT VIEW presents a very different picture of Michelangelo's works: the exhibition shows photo-mechanically reproduced copies almost in original size and in a way that invites visitors to look at them in a contemplative and at the same time enthusiastic manner. Where you have to look up in the Sistine chapel, in the exhibition the masterpieces are on the ground, so that visitors can walk around the gigantic masterpieces, giving a unique "different view" of Michelangelo's masterpieces.

Under the license of the Vatican Museums, the images were reproduced and transferred to special fabric webs. This technique allows a true-to-life reproduction and gives a glimpse of the works, which, apart from Michelangelo, has so far been given to only a few people.
