What's New in Big Sky Winter 2023-24

Big Sky Resort Updates

New Lone Peak Tram Soars During the 2023-24 Season

For 28 years, Big Sky Resort has been renowned for the iconic [Lone Peak Tram](#), which carried skiers, snowboarders and sightseers to 11,166 feet for some of the most thrilling terrain available anywhere and unsurpassed views of the surrounding area. After an incredible feat of engineering and construction, Big Sky Resort will delight guests this season by unveiling a completely new tram, which will feature state-of-the-art technology to whisk riders to the top with unparalleled comfort. The new tram features a spacious cabin with floor to ceiling windows to take in the Alps-like exposure of Lone Peak. Guests who wish to sightsee can ride the tram up to take in the breathtaking views at the highest scenic overlook in the state and enjoy the peaceful ride down the mountain. In winter and summer, sweeping views of Montana, Idaho, and Wyoming, as well as Grand Teton and Yellowstone National Parks will be waiting for tram passengers at the mountain top. In the final phase of Big Sky 2025, and in time for the 2024-25 season, the addition of an all-glass viewing platform will be added to the mountain top with panoramic views of the surrounding peaks, and down the fall line of Lone Mountain through a glass floor.

Big Sky Resort Celebrates 50 Years (2023-24 Season)

In 1973, Big Sky Resort opened with four lifts and less than 20 trails. Fifty years later, with 300+ trails spanning 38 lifts, Big Sky Resort is celebrated as a world-class North American ski destination. A legacy of innovation continues here, as Big Sky Resort marks its 50th year with the most monumental project yet – the brand new Lone Peak Tram.

Big Sky Resort Offers Night Skiing (2022-23 Season)

As the sun sets on Lone Peak, fasten your headlamp and get ready to ski. A private, guided tour of Andesite Mountain begins with a ride up Ramcharger 8, complete with heated seats and a weather-proof bubble. The views are a little different at night: countless stars illuminate the sky and distant snowcats methodically prepare the slopes for the following day. Headlamps provided are as powerful as a car headlight, illuminating the way for guests carving down freshly groomed runs.

The Umbrella Bar Opens at Big Sky Resort (2022-2023 Season)

The New Umbrella Bar elevates the liveliness in the Mountain Village, transporting guests to a European-style après ski experience. Expansive 360-degree views through an all-glass enclosure allow for enjoying draft beers or craft cocktails with a front row seat to Big Sky's Lone Peak. Located adjacent to the Summit Hotel, the new Umbrella Bar offers al fresco après on warm spring days and a toasty, intimate setting for a mid-winter warm-up. The bar opened for the 2022-23 season.

One&Only's First Luxury Resort in the US is Coming to Big Sky (2024-25 Season)

One&Only Moonlight Basin in Big Sky will open its doors in the winter of 2024-25, making it the first One&Only resort and residential community in the United States. Located between Lone Peak and the Spanish Peaks, the property will showcase Montana's breathtaking scenery and will be connected by gondola to Big Sky Resort's world-class skiing, as well as provide access to mountain golf courses. The brand's first alpine resort will be designed by renowned architect Olson Kundig and will include 73 guest rooms and suites in the main lodge, 19 secluded villas throughout the resort, a separate ski lodge, and a Chenot Spa. In addition, the resort will introduce the first community of One&Only Private Homes in the U.S., offering 62 private residences throughout the landscape.

Montage Big Sky Opens, Elevating the Destination to a New Level of Luxury (2021-22 Season)

Montage Big Sky opened in winter 2021, offering an unparalleled array of experiences for every season. Resort amenities include ski-in/ski-out access to Big Sky Resort's 5,850 skiable acres, a three-meal restaurant, lobby bar and lounge, market, pub, bowling alley, two pools, 12,870 sq. ft. of meeting space, golf course and the signature Spa Montage. The resort is centrally located within Big Sky's 3,530-acre Spanish Peaks enclave and features 139 guestrooms, suites, and residences, with a mountain modern design and a timeless palette of regional woods and stones inspired by the natural setting.
