Dennis

232 Sesuit Neck Road, East Dennis

Tour benefiting Cape Cod Hydrangea Society

More than 250 hydrangeas can be found at this East Dennis property located in the scenic Sesuit Neck neighborhood. The yard is bordered by hydrangeas and more can be found throughout the interior gardens. This sizeable collection is in full bloom from the end of June onward through the 'antique' season in September. The *Hydrangea macrophylla* species dominates the scene and there are several cultivars in the mix – many planted en masse - which makes for interesting viewing.

The Cape Cod Hydrangea Society is especially pleased to have Gail & Mike open their outstanding garden for us again this year. This is a very visible must-see hydrangea location. You absolutely cannot miss the blue hydrangeas! Docents will guide you to parking.
