

Duke Energy Convention Center

Duke Energy Convention Center Statement

Spectra Venue Management leads the public facility industry in response to the Covid-19 pandemic. The Duke Energy Convention Center has implemented the most stringent protocols for cleaning, disinfection and infectious disease prevention in its facility. DECC has achieved Global Biorisk Advisory Council® (GBAC) STAR™ accreditation, the gold standard for prepared facilities, under the guidance of GBAC, a Division of ISSA, the worldwide cleaning industry association.

As the cleaning industry's only outbreak prevention, response and recovery accreditation, GBAC STAR™ helps organizations establish protocols and procedures, offers expert-led training and assesses a facility's readiness for biorisk situations. The program verifies that Duke Energy Convention Center implements best practices to prepare for, respond to and recover from outbreaks and pandemics.

The DECC team closely follows all public health guidelines issued through the CDC, the Ohio Department of Health, the City of Cincinnati and Hamilton County Health Departments. Our protocols have allowed us to safely host public meetings, a virtual meeting, training events and other smaller gatherings all with safe distancing, mandatory masking at all times, employee health checks and strict capacity limits. The Center has available personal protective equipment, sanitization stations, "safe distance" signage and continually exceeds all standards for safe operation.

The Duke Energy Convention Center stands prepared for business and meeting industry events and can meet all health requirements. Our proven ability to exceed industry benchmarks for safe operation will allow us to provide service to the business and meeting community in a variety of capacities. While we cope with daily life in a safe manner, we look forward to creating an environment that will help our many customers continue to do business as they meet their goals of hosting successful meetings.
