## TENNESSEE STATE CAPITOL

Opened in 1859, the Tennessee State Capitol is a magnificent tribute to the people of Tennessee. This graceful structure was designed by noted architect William Strickland, who considered it his crowning achievement. When Strickland died suddenly during construction in 1854, he was buried in the north facade of the Capitol. The grounds of the State Capitol contain statues of several notable figures in history, including President and Mrs. James K. Polk. One of the oldest working capitols in the United States, the Tennessee State Capitol serves as home of the Tennessee General Assembly and houses the governor's office.
