Introduction

This report examines the volume and value of tourism and the impact of visitor expenditure on the local economy in Gloucestershire in 2021.

The figures were derived using the Cambridge Economic Impact Model undertaken by The South West Research Company (TSWRC). The model utilises information from national tourism surveys and regionally/locally based data. It distributes regional activity as measured in those surveys to local areas using 'drivers' such as the accommodation stock and occupancy which influence the distribution of tourism activity at local level.

For further information on the Cambridge Model and the terms used in this report please see Appendix 1 which accompanies this report.

For an overview of 2021, including key facts about the economy, weather and key events please see Appendix 2 of this report.

Methodology note

This year's outputs are for the Covid hit year of 2021 and as a result our approach to the project again needed to change. There has been very limited national survey data available for the subject year due to the pandemic and certainly nothing at a regional level or below to date, so as a result 2019 outputs were used as the foundation from which 2021 outputs were estimated.

Covid impact data was gathered by TSWRC from February 2020 onwards which was used alongside other local survey data and national level outputs and forecasts and applied to the 2019 outputs for each area to model the 2021 input data. Once the input data was calculated the Cambridge Model was then used to produce the outputs for 2021 and as such, they are comparable with previous years whilst noting the changes above.

Employment figures show a decrease compared to the 2019 data. However, many more tourism jobs will have been supported by Government support schemes in place in 2021 due to the pandemic e.g. furlough scheme. So the 2021 figure is an estimate of jobs supported by the 2021 visitor spend rather than an actual change in the employment numbers when compared to previous years.

Gloucestershire - Key facts at a glance

Gloucestershire - Staying visits by accommodation type

Domestic tourists	Trips	Nights	Spend
Serviced	528,000	1,054,000	£108,120,000

Gloucestershire - Direct visitor expenditure by category

Information on the breakdown of visitor spending is available from the three main tourism and day visitor surveys by type of visitor. The Model divides the expenditure between five sectors:

- Accommodation
- Shopping for gifts, clothes and other goods
- Eating and drinking in restaurants, cafes and inns
- Entry to attractions, entertainment and hire of goods and services
- Transport and travel costs including public transport, purchase of fuel and parking

The following pages look at the breakdown of this expenditure and business turnover arising from this expenditure.

By applying the expenditure breakdown to the estimates of visitor spending the Model generates estimates of total spending by the five business sectors. Visitor expenditure in each sector represents additional turnover for businesses in those sectors. However, evidence from national studies suggests that some minor adjustments are required to match visitor spend to business turnover. In particular, some expenditure on food and drink actually takes place in inns and hotels that fall into the accommodation sector and at attractions. The turnover for each business sector has therefore been adjusted to take account of these marginal changes. More significantly, expenditure on travel costs associated with individual trips is as likely to take place at the origin of the trip as it is at the actual destination. It is therefore assumed that only 60% of total travel expenditure accrues to the destination area.

Gloucestershire – Direct visitor expenditure by category

Accommodation

- UK staying visitors £121,488,000
- Overseas staying visitors £8,101,000

Totals

£129,589,000 (15%)

Shopping

Supplier and income induced	£177,059,000	£227,024,000	£404,083,000
Total	£488,570,000	£754,458,000	£1,243,028,000

Gloucestershire – Tourism related employment

Having identified the value of turnover generated by visitor spending in each business sector it is possible to estimate the employment associated with that spending.

The use of visitor expenditure to generate job numbers underestimates the number of jobs arising in the attractions/entertainment sector. The underestimate arises because local authorities and voluntary bodies do not always seek to recoup the full operating costs of individual attractions or facilities from entrance charges. Therefore an additional percentage of direct employment is added to the attractions sector estimates to take account of this factor.

This section of the report looks at employment on three levels;

- **Direct Jobs** - Direct jobs are those in businesses in receipt of visitor spending. For example, jobs supported by visitor spending at a hotel would be direct jobs.
- **Indirect Jobs** - Indirect employment arises as a result of expenditure by businesses in direct receipt of visitor expenditure on the purchase of goods and services for their businesses. For example, some of the employment at a business supplying food and drink may be supported through the supplies that the business sells to hotels (or any other business in direct receipt of visitor expenditure).
- **Induced Jobs** - Induced jobs are those that are supported by the spending of wages by employees in direct and indirect jobs. Such spending will be spread across a wide range of service sectors.

Estimates are shown for actual jobs and full time equivalent jobs (FTE's).
