Reset

Deselect all tools and reset screen to its original appearance.

The value of AudioEye Pro – DIY Accessibility

- Our Al/machine learning technology helps you address some of the most common WCAG issues.
- The AudioEye Builder Tool provides Al Guidance, which means WCAG errors are identified for the customer to either fix each error or reject the recommended fix.

- Please note that Pro customers must manually scan this list, approving fixes one by one.
- Discounted pricing options are available for the AudioEye Managed solution, under which AI technology automatically fixes those common errors, saving significant time and effort. This solution also includes Manual testing & remediation.

The value of AudioEye Pro - Training Archive

- AudioEye Pro includes access to AudioEye's **Training Archive**
- The Training Archive allows for continued education on accessibility.
