WHAT IS PAID SEARCH?
THE SEARCH ENGINE RESULTS PAGE (SERP)

Possible keyword set might include:

- Boat rentals near me
- Weekend boat rentals
- Lake union boat access
- Rent boats Lake Union
- Speedboats for rent in Seattle
- Boating lessons Seattle
- How to rent a boat in Seattle
- Where to rent a boat in Seattle
- Boat rental prices Seattle
WHY IS PAID SEARCH IMPORTANT?

BE AVAILABLE TO THE USER WHEN THEY LOOK FOR YOU

- Be available to the user when they are looking for you or what you offer
- Increase brand visibility
- Control the messaging
- Outbid your competitors
- Address a specific audience
- Highlight special offers
- Learn about your customers
- Measure what is and is not working
BEST PRACTICES
DEPENDENT ON YOUR BUSINESS GOALS

- Test hypotheses as often as possible
- Optimize your campaigns towards your business goals
  - Consider the attribution journey (nonbrand to branded terms)
- Bring users to the landing page that best fits what they are looking for, consider their queries
- Set geographic targeting, ad schedules, ad rotation set to optimize
- Comb search term reports regularly, either for new keyword opportunities or negative keywords
- Determine your audience(s) and create messaging and targeting around those groups
- Use auction insights, impression share, average position and CTR to determine appropriate keyword bids
- Try some automated tools, determine viability
- Remember the importance of site speed
THINK WITH GOOGLE INSIGHTS
WHAT ARE USERS LOOKING FOR?

Today, people can—and do—optimize their lives with search.

Whether it's taking a vacation or going out to dinner, people curate their experiences before they go.

It helps them get excited, lets them feel more confident and less anxious, and makes them feel like they’re getting the most out of every moment.

Sources (3)

Why people need to "know before they go"

Today people can – and do – prepare for every aspect of any experience, big or small. Whether they’re taking a vacation across the globe or dining at a neighborhood café, people have a low tolerance for surprises.
1 Spark excitement about an upcoming experience

In the early stages of planning, many want a look at what their experience could entail. And that sneak peek sparks excitement. We often see this behavior play out in search. For example, we've seen over 55% growth in mobile searches for "menus" over the past two years.¹

Anticipation then builds as people research and discover more about an upcoming experience. "I start my Google Search with 'best'... and take it from there," said Ana R., 42.

  - Best hotels with waterslides

ENTERTAINMENT QUERIES

- Oasis spa review
  - Best concerts 2018
  - Best museums in the world
  - Nashville bars with live music
  - Movie theaters with food
2. Build confidence before heading to a new destination

People feel a need to prepare for every detail of their experience — from exploring maps to confirming business hours. Consider this: mobile searches for "wait times" have grown 120% over the past two years.²

Researching these smaller details ahead of time alleviates stress and gives people confidence heading into an experience. "I guess I just don't like looking or feeling lost. It just gives me anxiety," said Ivette B., 26.

- When is Caribbean hurricane season
- NYC subway map
- Is it safe to travel to Mexico

**ENTERTAINMENT QUERIES**
- Disneyland ride wait times
- Is food allowed in San Diego Zoo
- Magic Kingdom map
- Six Flags hours
- Can you bring a guest to Planet Fitness
3 Make the most of a budget

Nobody likes to be surprised by an unexpected expense. People want to account for every penny up front. In the past two years, mobile searches for "do you tip in _" have grown over 70%.

But it’s not just about saving money. People want to make sure they get the biggest bang for their buck. "My research really helped me have a great NYC experience at a price I could afford," said Gloria V., 44.

HOW TO LEVERAGE THESE INSIGHTS

▪ Understand intent signals

▪ Whether it's to get excited, build confidence, or manage their money, people are using search to shape and validate the decisions they make. To ensure you’re part of their consideration set, pay attention to the intent behind people’s searches and adapt your messaging accordingly.

▪ Build useful tools

▪ People rely on the web to plan the best experience possible. Provide assistance with tools that cater to these experiences. You can help people understand all the features and amenities you offer, interact with experiences before booking, or manage overall trip logistics

▪ Do your research

▪ To get your brand into the consideration set early, understand the unexpected ways people are searching. Not sure where to start? Check out Google Trends to see how people search for your brand.
The Curious Consumer

People have become research-obsessed, even about the small stuff. Today, people are researching more than ever, so each decision — be it big or small — is an informed one.

> 80% growth in "best" mobile searches in the past two years.¹

Ensure your content and search copy convey how your products meet these needs and that you show relatable, real-life use cases. Google’s machine learning can automate keywords and ad creative to help you capture the various ways consumers are expressing this quest for the best.
The Demanding Consumer

Today, people expect every digital experience to be personalized just for them, even when they include few details and don’t explicitly spell out their request.

“Customer expectations and the customer evolutionary cycle are definitely going through a step change. Our customers, in a good way, continue to be more demanding day by day.”
