

2026 Ely Dark Sky Festival

March 19-22, 2026

We are seeking activities, seminars, and outdoor recreation opportunities for this year's Ely Dark Sky Festival. While the event's primary focus is on our area's beautiful and pristine dark skies, there are so many ways to celebrate from night sky bathing, to astrophotography, to a night ski. Any and all activities are welcome.

Please complete one form for each unique event. If you plan to hold the same seminar or activity at two different times or days, please use a single form.
