

Town of Victor – Draft Plan for Salons & Spas

Salons & Spas:

- Online booking
- Clients wait in their car for a call or text that the room and service provider are ready for them.
- Mask for staff and clients when in close contact ex: nail rooms.
- Hand washing for both clients and staff for 20 seconds before and after service
- Wiping down all surfaces with Hospital grade disinfectant in between each client.
- Spread appointments out so clients have little to no contact with each other
- Have clients handle their own credit card, pay with checks, cash or online options.
- Make sure Massage tables have some kind of vinyl covers over table warmers that can be sanitized.
- Updated intake forms for clients health history making it clear that if they have or have had any of the symptoms in the last 48 hours they need to cancel or reschedule
- A plan put in to place for the staff if they are experiencing any symptoms to stay home.

Bathrooms:

Additional Hand Sanitizers in and out of Bathrooms

This is a general recommended guide to reopening your business.

1. Full detailed certified cleaning of the business. (have a certificate showing that was done upon reopening)
2. Cleaning in between clients
3. Providing mask's free of charge to each client
4. Placing additional hand sanitizers dispensers
5. Setting appointments - limited amount of clients. Have a questioner for when setting up appointments.
6. Restricting the number Reduced the amount of clients by 65%
7. Making sure that employees have Personal protective gear
8. Have tape on floors to help clients recognize where they are standing.
9. Plastic barriers for employees
10. Installing inferred camera's for detecting temperatures. (we are not allowed to take clients temperatures) (I can install these, they are pricey)
