

Social Distancing

How can you establish visual reminders of 6' separation? Floor markings, reorganization of fixtures?

Signage should be "plain English". Look for existing signage on line instead of being creative

Are there ways you can distance your staff from customers, adding barriers?

Hand Cleaning

Employees must wash hands regularly with soap for at least 20 seconds

Hand sanitizers are acceptable as an interim, especially after transfer of documents.

Consider the extra time and equipment employees might need in order to complete these tasks

The Town of Victor offers the following considerations as businesses develop their re-opening plans.

You should also look at the resources with the CDC and NYS DOH

Masks

Employees in direct contact with public must properly wear masks

Customers should be directed to wear masks within buildings

Other forms of barriers—sneeze guards, gloves, etc.—are good ways to show public how you're protecting them

Disinfection

Surfaces should be regularly cleaned. Look at not only counters, but phones, keyboards, POS units, door handles, staplers light switches, steering wheels, etc.

Consider a cleaning program not only once a day, but throughout the day. This may give customer's confidence in your activities!
