4R Ranch Vineyards and Winery

Where the shortgrass prairie drops into the Red River Valley, the 4R Ranch, with its magnificent vistas and rocky terrain, is perfectly suited for growing grapes. Patriarch W.C. Roper encouraged his family of sixth-generation Texans to share the beauty of this extraordinary place with others; and so it was love of this man and love of the land that inspired 4R Ranch Vineyards and Winery. Powered by sun, earth and wind, 4R Ranch Vineyards and Winery calls us all to slow our pace, enjoy the view and sip a glass of wine in the magnificent Red River Valley.

Homestead Winery

Homestead Winery is the oldest continually operating winery in the Red River Valley of North Texas. Barbara and Gabe Parker started Homestead desiring to continue the Parker family farming tradition begun by Gabe's grandfather more than 100 years ago. The vineyard was planted in 1983 starting with Cabernet Sauvignon and Chardonnay. We have three tasting rooms where you can enjoy our wine. The Ivanhoe tasting room is located inside the old Parker House which was built by Gabe's grandfather in the 1890s. Enjoy a tasting sitting in one of the indoor rocking chairs or out on the front porch swing. Homestead's Grapevine tasting room is situated in an 1890s Victorian home just off of historic Main Street. The Denison tasting room is located in historic downtown. While enjoying their wines, you can also explore beers from Ivanhoe Ale Works. Homestead is the first winery-brewery in Texas! CHEERS!

Rancho Loma Vineyards

In the heart of Texas, six creative individuals and couples with unique backgrounds and experiences collectively had the vision to create Rancho Loma Vineyards. From its inception, they have stayed true to their vision of creating award-winning wines that showcase the unique terroirs and varietals of this remarkable state. From the vineyards of Coleman County come elegant Grenache, Syrah and Mourvèdre. To the northwest near Lubbock, High Plains vines yield the richness of Tempranillo, and distinctive Viognier, Roussanne and Marsanne. Decades of discovery by dedicated vintners have revealed the red and white grapes that shine in Texas' challenging microclimates. This shared wisdom has enabled the creation of our wines lauded worldwide.

A Few Commonly Asked Questions About Wine

Q: Should you follow the rule to drink red wine with red meat and white wine with white meat?

A: No. Although some food and wine combinations are more compatible, you should serve what you enjoy and what tastes best to you and your guests.

Q: Why should wines be stored laying down?

A: To keep the corks wet and prevent air from getting into the bottle.

Q: Why are wineries starting to use screw caps and synthetic corks instead of real corks?

A: There is a worldwide problem now with tainted corks (from bacteria or chemical exposure) which cause wines to smell and taste “corked.” A screw cap, although lacking the romance of a cork, is the most effective wine closure. Synthetic corks are effective but are often hard to put back into an opened bottle. For wine that needs several years of bottle aging to mature, a real cork is still the best method.

Q: Is room temperature the appropriate temperature to store and serve wine?

A: Room temperature is really cellar temperature which would be 55 to 60 degrees, not temperatures in the 70s or higher. Red and white wines best served at cellar temperature, but you may chill white and rosé wines, if you prefer. Champagne and sparkling wines should be served well-chilled.

Q: When tasting several wines, what is the best order in which to taste?

A: The general rule is dry white before sweeter white wines, whites before reds, light reds before heavy reds and dessert wines last. It is easier for your palate to accept the flavors this way.

Q: Why do people swirl wine around in the glass before drinking, and does it help or just look good?

A: Swirling exposes wine to the air which helps release its aroma and bouquet. It also helps warm up a wine that is too cold.

Q: What are legs and do big legs mean a wine is good?

A: When you swirl wine around in a glass the legs are the tears that run down the inside of the glass. It has to do with the alcohol in the wine and means nothing by itself. A good wine must have all the elements—fruit, acid, alcohol, tannin, oak (if barrels are used), etc.—and must have them in balance.

Wine-Tasting Terms

Acidity The quality of tartness or sharpness in a wine

Aroma Fragrance of the wine that comes from the grapes

Astringency Puckery feeling in the mouth from the tannins, or tannic acid, in red wines which comes from the grape skins (red wines also obtain their color from the skins)

Balance Harmonious combination of all the sensory elements of wine - fruit, acid, alcohol, nose, residual sugar (if any) and oak if barrels are used for fermentation and/or aging

Body The feeling of a wine's consistency, or weight, in the mouth, usually associated with the alcohol content

Bouquet Fragrance of the wine that comes from fermentation and aging

Clean Free of any off and/or unpleasant smells and flavors

Corked A musty, wet cardboard odor caused by a bad cork

Crisp Good, pleasant acidity

Dry The absence of sweetness

Finish The taste, smell and feeling in the mouth remaining after a wine is swallowed; a good wine usually has a nice, lingering finish

Fruity Aromas and flavors of the grape (a wine can be fruity and still be dry)

Hot A feeling of heat through the nasal passages and mouth when the alcohol content of a wine is too high and out of balance

Nose The total aroma and bouquet of a wine

Off An undesirable odor and/or taste

Thin Lack of body
