The largest motion picture to be produced in Oklahoma film history, **“Killers of the Flower Moon”** depicts the true story of the serial murder of citizens of the oil wealthy Osage Nation in 1920s Oklahoma as told in the best-selling novel by David Grann.

Produced by Apple Studios with distribution by Paramount Pictures, the film is directed by Academy Award winner Martin Scorsese (“Taxi Driver”) and stars fellow Academy Award winner Leonardo DiCaprio (“The Revenant”) and Robert De Niro (“Raging Bull”) as well as Lily Gladstone (“First Cow”) and Jesse Plemons (“The Irishman”) among an all-star supporting cast.

Respectfully honoring the origins of this true story, the production filmed in many of the actual communities throughout the Osage Nation and outlying areas where these historic incidents occurred including Pawhuska, Bartlesville, Fairfax, and Tulsa to name a few.

“Killers of the Flower Moon” had a qualified direct spend of more than \$127 million in Oklahoma generating an additional \$72.3 million in economic output over 154 preparation days and 99 days of filming. The production created more than 470 local career opportunities for crew and an additional 1,200 roles for individuals serving as background talent.

“We respectfully acknowledge that we are on the traditional, ancestral lands of the Osage Nation. The process of knowing and acknowledging the land we stand on is a way of honoring and expressing gratitude for the ancestral Osage people who were on this land before us.”
