WASHINGTON STREET CONSTRUCTION

Downtown Streetscape Project

Washington Street

The City of Greensburg, in partnership with HWC Engineering, has awarded contracts to Schutte Excavating for the reconstruction and enhancement of Washington Street from Franklin Street to Monfort Street. This project, funded by a Community Crossings Matching Grant from INDOT, Indiana Economic Development Corporation, The Indiana Regional Economic Acceleration and Development Initiative (READI), the American Rescue Plan Act (ARPA) funds, and local match, is scheduled to take place from October 2024- September 2025 in multiple phases. However, please note that this schedule is subject to change. Any updates will be communicated to businesses, property owners, and residents. During the project, property owners, businesses, and residents will be contacted by the City of Greensburg regarding utility work. Water service may need to be temporarily shut off to facilitate work beneath the sidewalks. The Water Office staff will collaborate with Washington Street businesses to determine a day for utility work that will minimize disruptions.

TENTATIVE CONSTRUCTION TIMELINE

- **PHASE ONE: November 4–January 2, 2025**
