

TOTAL SOLAR ECLIPSE 2024

HAMILTON COUNTY, INDIANA

Hamilton County will experience one of the most incredible natural phenomena in our skies: a total solar eclipse. This natural event has been known to draw visitors to destinations leading up to the event.

Hamilton County Tourism is making plans and convening local organizing committees to help coordinate and educate our partners, cities, and towns to activate for the event. HCT will promote our community to regional and national markets as a place to visit for the 2024 Eclipse. HCT will soon begin compiling partner events, restaurant, retail and hotel deals and packages for the Eclipse.

WHAT IS A TOTAL SOLAR ECLIPSE?

A total solar eclipse occurs when the Moon passes between the Sun and Earth, completely blocking the face of the Sun. The sky will darken as if it were dawn or dusk. The next total solar eclipse that can be seen from the contiguous United States will be on Aug. 23, 2044.

“The 2024 solar eclipse is expected to be the largest mass travel event ever in the U.S.—a celestial experience expected to be breathtaking, spiritual, and impactful.”

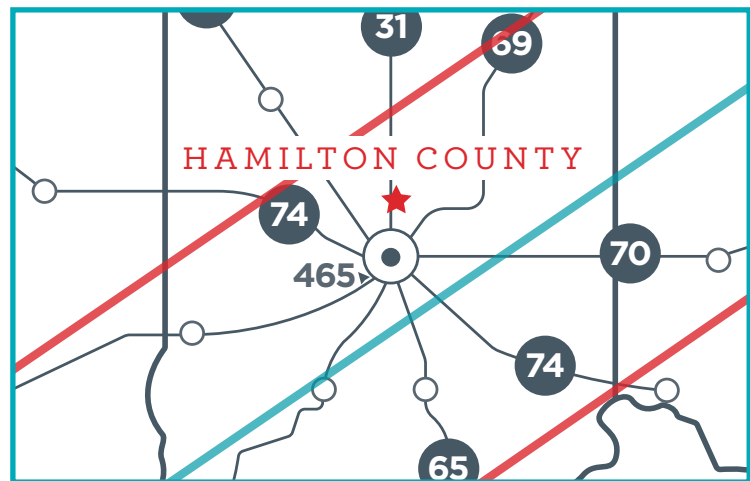

- Laurie Wilson, Roadtrippers.com

WHEN: MONDAY, APRIL 8, 2024

The sky will begin to change around 1:50 p.m. with totality at 3:06 p.m.
