

In the GRB Studio's basic setup, you walk into a room already complete with:

- A full video-switching system and engineering bay capable of mixing presentation content, camera feeds, and matrix routing
- A 36 instrument moving-light package for stage washes, environmental effects, and backdrop décor, already installed and rigged in the ceiling
- An 11' x 20' LED Wall to serve as a digital backdrop, set piece, or virtual green-screen studio
- (2) 4K Capable Robotic Cameras to ensure safe-distancing practices while capturing stellar footage, with options for expanding to manned cameras
- 4 HD Recorders to handle camera feeds, program cuts, and presentation content
- A robust audio system with digital matrix switching needed for streaming live events
- An Epiphan Pearl streaming appliance for one-way feed delivery to any streaming platform

READY-TO-GO OPTIONS

- An IFB system for communication with presenters and moderators
- VMIX virtual streaming system to include live remote presenters and talent
- Custom or Stock Set Elements to create a multi-studio feel and activate bands
- Presenter support package including multiple graphics computers, media servers and monitor package for presenters' confidence
