POST COVID-19 LGBTQ+ TRAVEL SURVEY

The International LGBTQ+ Travel Association recently surveyed members of the LGBTQ+ community to gauge their attitudes toward leisure travel in the face of the Covid-19 pandemic. Responses came from approximately 15,000 LGBTQ+ travelers around the world, with the largest representation from the United States, Brazil, Canada, France and Mexico.

“Previous studies have shown our community to be a resilient and loyal travel segment with a tendency to travel more than their non-LGBTQ+ counterparts,” said John Tanzella, IGLTA President/CEO.

“We wanted to document their sentiments during this particularly challenging moment in time to remind the tourism industry at large that LGBTQ+ travelers should be a valued part of their recovery plans. Messages of inclusion have the potential to resonate even more strongly with LGBTQ+ travelers now.”

METHODOLOGY & DEMOGRAPHICS

The IGLTA Post Covid-19 LGBTQ+ Travel Survey was conducted between 16 April and 12 May 2020 through the association's global network, including members and media partners, with support from the IGLTA Foundation. The responses came from 14,658 individuals around the world who identify as LGBTQ+. The survey was conducted in six languages: English, Spanish, Italian, French, Portuguese and Japanese. **This presentation focuses on the results from 2,330 LGBTQ+ individuals who live in Brazil and responded to this survey.**

DEMOGRAPHIC BREAKDOWN OF BRAZILIAN RESPONDENTS

- 90% of respondents identified as gay; 8% bisexual; 2% as other
- 80% of respondents are between the ages of 25 and 54
- 96% of respondents are men; 2% are women, 2% listed other gender identities or preferred not to say

KEY FINDINGS

 Once global timelines and safety protocols are established, there is a **strong desire amongst LGBTQ+ travelers to resume travel in 2020.**

 **Two-thirds** (64%) of respondents living in Brazil said they **would feel comfortable traveling again for leisure before the end of 2020**, with October and December being the most popular choices.

 **41%** of the respondents living in Brazil said they **would not change the types of destinations they choose to visit** after the coronavirus situation is resolved, reflecting a **high degree of destination loyalty amid the uncertainty.** While 27% of respondents are still undecided, only about 32% said they would change their destination choices.
