

Video Entry Option: We acknowledge that applicants may not have the capacity to complete an application. To increase access to the opportunity, we are providing applicants an option to submit an **optional** 2–5-minute video in place of the online application. The video submission should include a walkthrough of your current library, and your proposed project(s) for a library makeover and/or refresh.

The video can be recorded on a cell phone or digital camera. Please note, video and written applications will be evaluated **equally**, please choose the route that works best for you and your team. If the committee selects your video entry to move forward, additional information requested in the grant application will need to be collected ahead of final consideration.

We encourage you to be creative in your video if that is what you choose to submit and incorporate answers to the following questions:

1. How would you spend the grant funds on your proposed library makeover or refresh?
2. How is the library or literacy space currently used by students, staff, and the community?
3. How would your proposed library makeover or refresh benefit your community?

Optional video entries should be sent to community@indianasportscorp.org no later than January 4, 2025, at 11:59PM ET for consideration.
