

[The announcement](#) of substantial funding to transform scientific breakthroughs and build on new discoveries and treatments, is an exciting development for Greater Manchester.

This is the largest research award Greater Manchester has ever received and demonstrates the high-level expertise of The National Institute for Health and Care Research, Manchester Biomedical Research Centre (BRC), that will put us in the position to be at the forefront of cutting-edge medical technologies and life-saving treatments.

Just last week, our Life Science Business Development Manager Richard Fountain travelled to the US for the MedTech Conference in Boston, to share these messages and network with businesses looking for opportunities to collaborate and expand into our successful eco-system.

This is just one of a few international trips in the MIDAS calendar over the last few weeks that are instrumental to our work.

We met with Osaka City & Chamber of Commerce in **Japan** to share knowledge about decarbonisation.

We took away inspiration on progressive finance for a changing world whilst at **SIBOS in Amsterdam** and promoted the benefits of a closer collaboration between the Northern Powerhouse and Northern Germany, at the **Hydrogen Technology Expo in Bremen, Germany**.

Next month you'll find us at the **Singapore Fintech Festival**, where we look forward to sharing news from our fast-growing green finance and payments cluster and updates on how we're meeting the demand for the next generation of Fintech talent.

Best wishes,

Rhys Walley, Acting Managing Director, MIDAS and Executive Director Manchester China Forum

Events

Serendipity Labs Manchester Launch Event

The Serendipity Labs team would like to invite you to their official launch on Thursday 17th November, 4:30-9pm at Building 7, Manchester Exchange Quay.

This professional, modern workspace will feature five floors of private office space including exclusive full floor opportunities for larger teams, drop-in coworking membership plans and meeting & event space.

The event, that will declare the space officially open, will include networking opportunities, entertainment, food and drink.

Please [RSVP here](#) by 10th November.

In case you missed any our past events, you can find them in the '[Insights](#)' section of our website below. And as always you can keep an eye out for upcoming events in our '[Events](#)' section.
