

The Wyoming Legislature begins its 2026 budget session on Monday, February 9. The Jackson Hole Chamber of Commerce has been working with legislators, representatives, businesses, and the community to navigate the consequences proposed budget cuts could create. We support reasonable, responsible cuts and believe the Governor’s recommended budget, which saves money, funds essential services, and protects residents, should be approved.

Wyoming is not in a financial crisis, contrary to what is being communicated in some parts of the state. We are voters and investors in Wyoming, and we will support elected officials who prioritize businesses, residents, education, and the principles and programs that have provided a strong foundation for Wyoming for decades. Click the button below to find legislative officials’ contact information and make your voice heard before February 9.
