

JAMAICA

HEARTBEAT OF THE WORLD

Bulletin #3 - 2020 March 13

JAMAICA CONTINUES TO WELCOME VISITORS

Dear Valued Partners,

In the wake of the global outbreak of COVID-19, Jamaica has taken a number of preventative and proactive measures to keep our residents and your clients safe.

- Jamaica's Ministry of Health and Wellness has imposed travel restrictions to include eight countries in efforts to control the spread of the coronavirus: China, Italy, South Korea, Singapore, Iran, Spain, France and Germany.
- Travellers who have travelled to these countries in the past 14 days and do not have permanent residency or marriage exemption in Jamaica will not be landed on arrival to the island.
- Passengers will be screened at all the international gateways to Jamaica by heat sensing scanners, prior to entering the Immigration Hall.
- Quarantine facilities have been identified and isolation facilities are now at each of the island's public hospitals.
- You are invited to view the full list of destination protocols at www.jtbonline.org

In the destination we are focused on prevention management, as we believe we can and will overcome this public health threat.
