COVER ARTIST: Sarah Siltala
Sarah Siltala, one of this year’s “12 New Mexico Artists to Know Now,” was born into a family of professional artists and raised in Santa Fe. She has spent nearly two decades practicing and researching the painting techniques of the past. She also creates her own oil paints from dry pigment and handmade linseed oil in the tradition of the old masters. Her award-winning paintings have been included in museum shows and featured in national art publications. Learn more about her work on page 62.

Welcome to the second annual New Mexico Field Guide, a guide to all things arts and culture across the state!

Within, you'll find maps of major arts districts across Albuquerque, Santa Fe, and Taos, and listings of arts and culture businesses, organizations, and creative professionals statewide to help you navigate the New Mexico arts community and keep your finger on the pulse.

This year's guide is also extra special in that it features Southwest Contemporary's third annual "12 New Mexico Artists to Know Now." From an open call to artists submit work in any media this spring, our editorial team selected twelve artists whose work speaks to the compelling, vibrant, and challenging work being created in our home state. This series of profiles provides an “insider’s” view of the contemporary arts landscape and the premier talents continuously emerging across the state. Meet this year's artists beginning on page fifty.

This year, we also celebrate a few significant arts anniversaries on page nineteen and invite you to explore gardens—some cultivated, some wild—across Albuquerque, Santa Fe, and Taos on page twenty-two.

An extensive arts calendar section, beginning on page seventy-seven, signals the return of some degree of “normal” to arts programming this year, with more openings, exhibitions, workshops, and talks than you could possibly fit into your schedule.

Lastly, Southwest Contemporary publishes arts and culture news, reviews, and events every week online at southwestcontemporary.com. Find us online to sign up for our newsletter, become a member/subscriber, and stay in the know with arts in the Southwest year-round.

Thanks for reading!

CCA CENTER FOR CONTEMPORARY ARTS SANTA FE
SEEING THE CITY DIFFERENT BY IVAN BARNETT

On view through August 31, 2021
Patina Gallery, Santa Fe

by Patrick McGuire

For many artists, 2020 was a lost year not only for sharing work but also for making it. But when artist Ivan Barnett walked the emptied streets of his hometown of Santa Fe late last year, he saw a unique opportunity to rediscover the city he first visited as a boy. Though Barnett’s primary media are sculpture, drawing, and painting, he applied his design skills through his digital camera to create the thirty unedited images featured in Seeing the City Different.

Seeking to capture the “real town” of Santa Fe, the project took Barnett to well-known historical destinations, like the Santa Fe Plaza, as well as working-class neighborhoods, such as Agua Fria. Accompanying each image is a text that includes historical references and personal stories written by the artist.

We spoke with Barnett about his exhibition, the city of Santa Fe, and his transition to photography.

You’re generally known for creating mobiles and weathervanes. When did photography become one of your media?

I grew up in an artistic family where photography was always part of the vocabulary because my father would take pictures of different locations for his projects. I grew up with some very well-known photographers, so it was something always around. I don’t think I ever picked it up as a medium to create imagery per se the way I just did. However, when I was in China in 2012, I had my first digital camera and I started taking pictures with digital. That was sort of a turning point for me.

How did your creative approach to this project change since you typically create images and objects with your hands?

For me, it’s all about design whether I’m in a studio making a mobile or painting. It comes down to shape, color, form, and design—it isn’t any different. The camera is a tool for design and that’s why none of the images that I took have been cropped or edited. These are all full-frame images. I didn’t change one thing.

Santa Fe is sometimes criticized for prioritizing the wealthy over working-class locals. Is there an intentional or unintentional commentary on this that these photographs provide?

No, the subject matter crosses all cultural realms. I didn’t limit my locations to the gentrified parts of the city versus the more local parts of the city. We spent a lot of time in the different barrios off of Agua Fria. These are not gentrified locations; they’re working-class locations. The subject matter is what drove me to stop and take pictures. I’m less attracted to commercial spots and have always been attracted to the road less traveled. I wanted to show the Santa Fe that has diversity. Asking “what’s interesting?” is what drove the decisions, not the need to balance things in one spot versus another. I was interested in the real town, not as much in the commercial Santa Fe that’s promoted in all the magazines. The real town is what interests me.

Chiaroscuro Gallery and Gebert Contemporary, Santa Fe

From the adobe facade of the compound on Canyon Road, its steps to the gallery interiors surrounded by aspen trees, Chiaroscuro Gallery and Gebert Contemporary, which share an expansive property, offer patrons the opportunity to step into a world apart. And they’ve been doing so for twenty years now.

On the stretch of Santa Fe’s famous road that houses hundreds of galleries, these two affiliated spaces have stood out for decades in their curation of contemporary work. In the case of Gebert Gallery, that includes painting and sculpture from the international set (always making space for emerging artists as well as those already well established); at Chiaroscuro, work by twenty represented artists, which include all-embracing landscape photographs from the likes of Renate Aller to the architectural steel pieces of Peter Millet, challenge and inspire. And there are artists working in many media in between who are regularly on view here.

The director at Chiaroscuro, John Addison, has learned how to create a thriving market at the gallery by finding the right niche. “The Santa Fe art market is dynamic and ever-changing, and we’ve learned to carve out a unique niche for our represented artists and clients, locally and nationally.” In the face of such flux, this is, in part, what lends Chiaroscuro and Gebert Contemporary an enduring quality.

While patrons have been inspired for two decades now, the benefits run both ways. “Every solo exhibition we present brings with it a solid month of talking about a new body of work, which in many cases took the artist a year or more to create and a lifetime to conceptualize. This process of engaging the audience and immersing ourselves in the fresh artwork keeps us energized,” Addison said.

Despite the “seemingly endless decisions and forks in the road” that come with running a gallery, these sister spaces have managed to navigate the twin waters of business and the art world, but leaving it at that is too cold—they also highlight exceptional work, engaging audiences in ways as dynamic as that ever-changing art world outside the gallery doors.
The gallery represents a core group of twenty-six artists whose work runs the gamut. Here there are pieces from the likes of Jorge Leyva’s steel sculptures that meld both abstract and familiar shapes into graceful, albeit large-scale, pieces. You can find artists working in figurative painting, like John Tarahteef’s works in acrylic or Alberto Galvez’s striking portraiture on linen. Alongside these are abstract pieces by Claire B. Cotts, Hyunmee Lee, and Rose Masterpol, to name just a few of the artists you can find within these walls.

Nüart Gallery approaches curation with a sense of responsibility, operating with a keen awareness of how art impacts and enriches lives (viewers, patrons, and the artists themselves). And the purveyors at Nüart take the role seriously—and with a grain of salt—acknowledging what a privilege it is to be stewards of this work. A twenty-year track record is a testament to how well they do it.

Celebrate with Gebert Contemporary and Chiaroscuro by stopping in to see shows throughout the year that pay homage to the artists who have been represented by the galleries for the majority of the last twenty years.

20th Nüart Gallery, Santa Fe

Nüart Gallery has carved out its own little space for contemporary art on Santa Fe’s Canyon Road for the last twenty years, where its founders envisioned a place to exhibit their own favorite artists. It was the turn of the century as their plans got underway, and that sense of momentum and possibility has imbued the rooms of Nüart Gallery ever since.

Expansive, encompassing ten distinct spaces, the gallery is arranged in such a way as to move visitors through it with ease, never dulling their attention or creating distraction. The visitors found wandering throughout the gallery have been locals who wander in on an afternoon stroll as well as serious collectors traveling internationally.

SITE Santa Fe

SITE Santa Fe has become a mecca for blockbuster exhibitions, edgy contemporary art shows, and thoughtful pieces presented in new and surprising ways. This institution is equally well-loved and well-trafficked, striking a balance between drawing in crowds and maintaining integrity. SITE draws visitors and artists from all over the globe, underlining New Mexico’s name as one of the preeminent destinations for art in North America.

SITE is in it for the long run, taking up residence in the railyard district a bit more than twenty-five years ago in what was once a beer warehouse. Since then, SITE leadership has expanded the space to 35,000 feet in order to expand both operational and programmatic yardage, though each gallery maintains a certain intimacy that contributes to the overall experience. In addition to the galleries, educational and social spaces build out the rest of the expansive facility on Paseo de Peralta.

The institution was conceived to bring international arts dialogues to the Southwest, and has managed to do just that via its
earliest biennial exhibitions, and now through SITElines, a series of related exhibitions and community engagement pieces started in 2014 to create continuity between biennials and highlight all too often under-recognized perspectives. These work with the biennial structure (occurring every two years), but add a depth of focus by concentrating specifically on art in the Americas.

You could write a book on SITE Santa Fe’s history, track record, and plans for the future. But better just to plan a visit. Their website offers a comprehensive list of exhibitions and other programming, including the ongoing retrospective Mary Weatherford: Canyon—Daisy—Eden (through September 5, 2021).

Richard Levy Gallery has—for three decades now—been one of Central Avenue’s primary hubs for contemporary art from within Albuquerque city limits and well beyond. The downtown mainstay has been making waves since the ’90s when one of their inaugural events—an art fair in Chicago—inspired thirty more years of travel, art shows, and hosting exhibitions from their airy, modern home base at 514 Central SW.

Richard Levy Gallery has now become a local mainstay, highlighting cutting-edge artists from the state and region as well as those making waves nationally and internationally. The brick facade and large windows looking out to the sidewalk are (well, in times past) consistently crowded with people on First Fridays and busy with conversation about what’s currently on display.

The Richard Levy staff are spending 2021 reflecting on the gallery’s impressive lifespan and marking the event with a series of pop-ups in Santa Fe hosted in collaboration with Pie Projects. The first—for spring—opened in March, and summer, fall, and winter are on the books. In addition, the gallery proper will host a group show that celebrates the talent, brilliance, and collective momentum of the local community. The show, to be premiered in late fall, will be viewable by appointment only, though staff are keeping their fingers crossed that a traditional in-person reception might be possible by the time doors open in November.

What has kept the lights on at Richard Levy all these years? Richard Levy himself said that he’s learned “To always move forward. To trust in instincts. To work with good people.” That forward momentum has not only sustained the gallery but created both traction and opportunity for the city’s creatives. “Promoting the arts, building relationships, and supporting artists are so very rewarding on many levels,” Levy and gallery director Viviette Hunt said.

I asked what advice they would give to those just starting out in the art world, or those aspiring to the work that Richard Levy has done so successfully for thirty years. They said, “Be smart, be versatile, stretch yourself. Embrace challenges as growth opportunities, because there will be many.” They ended on a high note, summing up their success nicely with, “Do what you love. Love what you do.” ×
Beyond and between all of the amazing arts and culture destinations and happenings within this Field Guide are the landscapes, hiking trails, and natural features that make New Mexico such a special place. This year, we highlight a selection of gardens across northern New Mexico, from cultivated to organic and wild, that offer relaxation and respite any time of the year.

**Albuquerque**

**Albuquerque Biopark**
Adults and children alike will enjoy New Mexico’s largest botanic garden. Specialty gardens in the thirty-six-acre park include the Old World Garden, Mediterranean and Desert Conservatories, Heritage Farm, Sasebo Japanese Garden, Curandera Garden, Butterfly Pavilion, Fantasy Garden, Dragonfly Sanctuary Pond, BUGarium, and Tingley Beach. The adjacent zoo and aquarium—which are also part of the park—require separate entry fees. The River of Lights nighttime light sculpture displays at Christmas make for a memorable evening.

**Los Poblanos**
Gorgeous estate hotel complex and event center, with historic and contemporary New Mexican architecture, renowned restaurants, extensive gardens, lily ponds,
acequias, lavender and agricultural fields, and a farm shop that sells farm-produced lavender and other high-end goods. Gift shop and restaurant patrons are welcome to enjoy the grounds.

**Kitchen Gardens:** Part of the farm’s sustainable fields are dedicated to organic food production for the kitchens, including heirloom, native, and standard crops.

**Rose Greely Garden:** Formal Spanish-style gardens designed in 1932 by pioneering woman landscape architect Rose Greely. Greely, the first woman graduate of Harvard’s landscape architecture program, was known for designing beautiful residential gardens in DC. Greely’s roommate at Harvard was Faith, future wife of John Gaw Meem. Ruth and Albert Simms hired Meem to do the architecture of the Hacienda and La Quinta, and he brought Greely on to design the garden, her only known work in the Southwest.

**Judith Phillips Farm & Field Suites:** Fusion gardens feature more drought-tolerant species than have been historically planted at Los Poblanos, as well as specimen plants more typically planted around the property.

**Lavender Fields:** The Grosso lavender field generally blooms through mid-July, when flowers are approaching full bloom and are harvested to maximize the essential oils used in many of Los Poblanos’s products.

**Lily Pond:** Across the drive in front of the Hacienda is a beautiful pond lined with weeping willows and many colors of water lily.

Nikesha Breeze

Nikesha Breeze, who uses they/them pronouns, creates intensely ritualistic art to explore intergenerational trauma and healing. Their practice is informed by a Global African Diasporic, Afrocentric, and Afro-Futurist perspective. Their parents are African American and Assyrian. They identify as black, queer, intersex, non-binary, and a mother. They are also an activist, curator, and founding member of Earthseed Black Arts Alliance New Mexico. This to say, Breeze is complex. Their art processes and expresses this complexity with stunningly powerful awareness and compassion.

“I create spaces where Black, Brown, Indigenous, and Earth bodies can be seen as undeniably sacred and inviolable,” Breeze says. “My methodologies call upon ancestral memory and archival resurrection to surface faces, bodies, stories, and spirits that have been systematically erased from the master narrative.”

For example, their installation 108 Death Masks: A Communal Prayer for Peace and Justice is a meditation on lost and unknown ancestors, “the endless stream of death and the endless beauty of Black life.”

“Each face is sculpted from a single leather-hard clay slab that has been exposed to weather, tension, heat, gentleness, and violence, creating intimate and unique textures across the surface of the original ‘skin,’” says Breeze. “This skin is then pressed to the size and shape of my own skull. The resulting head-shaped blank face is then dried enough to be carved in detail.” This intimate and meticulous process is repeated to create 108 masks. The number is representative of endlessness and prayer, a signifier of the vast suffering of oppressed people as well as sacred bonds across time and place.

Breeze received the ArtPrize 3D Grand Prize and Contemporary Black Arts Award for this piece. A solo show titled Four Sites of Return: Ritual | Remembrance | Repatriation | Reclamation is on view at form & concept in Santa Fe through mid-June 2021. This deeply impactful show creates spaces of power with large-scale oil paintings, charcoal drawings, sculptures, site-specific installations, and conceptual performance interventions. ×

Something about furry fandom stuck with Tommy Bruce as a teenager. Today, his many-sided art practice comments on identity construction, often through Bruce’s real-life renderings of furries—an often-de-nounced internet subculture of people who adore anthropomorphized animals.

“It used to be that it was easy to distinguish the in-re-al-life from the virtual. Now, it seems the two worlds are colliding, spilling into one another for better and for worse,” the Albuquerque-based artist says. “New fron-tiers of identification and social communication birthed online now find their way into everyday discourse.”

Bruce—who earned an MFA in studio art from the University of New Mexico in 2020 and a BFA in photography from the Maryland Institute College of Art in 2014—employs photography, performance, writing, video, and experimental digital media in commenting on ecology, technology, media, and sexuality consider-a-tions that inform identity. Sometimes, Bruce literally plays the part.

“My fursona, Atmus, a white-tailed deer, acts as my stand-in and muse in my work. The series Real Problems came out of a fascination with portraying him in scenes of peril or faux violence,” Bruce writes. “Atmus is both a part of and apart from me; enacting these morbid fantasies feels like catharsis for my anxieties about our current crises.”

Bruce created the costumed Atmus, and other charac-ters in the series, with acrylic and foam materials. The anthropomorphized results are striking—and possibly uncomfortably too real for some viewers.

“The environments I set them in are collaged from sites of fantasy: video games, cartoons, and the like,” Bruce explains. “Both the figures and these spaces present a fantasy-made reality and one that has only been made possible by our deepening relationship to technology. I wonder, if I am living half my life through the screen, who is to say the person I am on there is not the real me?”

Bruce’s solo exhibition New Fauna is now on view at Ellsworth Gallery in Santa Fe through July 4, 2021.

The artist nicholas b jacobsen, who uses they/them pronouns, realizes the impact of settler colonialism, especially in the area where the artist grew up—the traditional and spiritual home of the Nuwu people in what is now called Utah. They have committed their art practice to untangling the brutal and invasive genocidal practice of removing Indigenous people from their immemorial homelands.

“I am an artist and researcher dedicated to unsettling settler-coloniality, being a witness to whiteness, and mending the human/nature divide in dominant U.S. culture,” jacobsen writes. “My research is slow, embodied, and place-based, emphasizing the time and attention it takes to develop a lasting, visceral understanding of something. Through my work, I want others to come away with an open, ongoing, multisensorial curiosity about themselves and the multiplicitous worlds that are submerged within.”

The artist, who says they’re a seventh-generation Utah-Mormon, confronts whiteness, hetero-patriarchy, and human exceptionalism in works that encompass installation, performance, video, ceramics, sculpture, text, and digital collage. The pieces are often altered objects and imagery from jacobsen’s experiences as a white person, a former member of the Church of Jesus Christ of Latter-day Saints, and as a desert dweller. They say that their art highlights “the parts of these histories that are often left out of the myths of Christian and U.S. American innocence and supremacy.”

The artist, who has worked as an assistant to Japanese ceramic artist Jun Kaneko, holds an MFA in art and ecology from the University of New Mexico and a BFA in ceramics/sculpture from Southern Utah University. They have also been bestowed numerous honors, such as best emerging artist by the Omaha Entertainment and Arts Awards. Today, jacobsen continues scuffling with their personal, ancestral, and inherited ideological histories.

“I was raised near Navajo sandstone cliffs, the Virgin River, and the Pine Valley mountains in Nuwu (Southern Paiute) territory,” they say. “After leaving Mormonism, this land is where I reformed my spirituality. I am in love with someone else’s homeland.”

After dreaming, I often wake up only with half-remembered snatches of the action that took place. The feeling of walking down a dark hallway, an impression of color or light, a single sentence that was uttered. The substance itself can be difficult to remember, to truly hold on to. But still, for many of us, dream images are something exact and full of meaning. As obscurely as they surface and sit with us, they materialize by no mistake.

The work of Emily Margarit Mason seems to me like pieces of dreams pulled from that otherworld. Yet, they are photographs—the medium that is so often supposed to be objective. Mason’s photographs are of staged, sculptural sets made from found objects and reconstructed photographs. They are surreal. Panes of glass bend, reflecting cracked earth. A sunset withers and wrinkles like a discarded sheet of paper. Shadows create structures that seem inhabited; a single datura blossom explodes in a shock of white. Objects are barely recognizable, just short of definite.

But that is not to say they are not truthful. This sort of confused truth-telling actually sets us up to investigate our own definition of the word. Mason translates the physical world from something seen to something felt, like a dream rich with veracity. In so doing, she strikes at the manifold nature of experience—building upon visual scenes to simultaneously conjure sensation, memory, emotion. Which is, in fact, quite an accurate representation of experience. ×

by Maggie Grimason
The Earth often feels entirely quantified; as if everything is laid out neatly and named. But of course, maps are surprisingly inaccurate. The relative size of things, even the fact that most of South America is east of Florida, are often eschewed in our own mental maps. And then, of course, there are the borders that shift, the rivers and glaciers slowly moving, and in our own neighborhoods, the “desire trails” created across a patch of grass trod by too many pedestrians, the nameless but familiar alleys that never shore up in any atlas.

Shannon Christine Rankin works with maps and their vernacular to orient us anew to the world and its most enduring quality: change. In series like *Earth Embroideries*, she transcribes melting ice sheets in Antarctica via satellite imaging into minimal depictions with thread on paper, literally confronting our attempt to hold on to (and hold in our hands) what we can, even as the environment around us shifts, both challenging and sentimentalizing the act of map-making.

With change inevitably comes fragility. Nothing lasts, old things fade away. Rubbings created from uneven topographies in charcoal create gulfs on paper; nautical charts lose their bearings in collages created as laments for polar ice sheets. By splicing, scaling up and down, and reimagining the structure we put to place, we are called to look closer and closer. To ask: what is that most familiar terrain beneath your feet and in your mind? The sandstone and shale on this swath of land are here because this was once a shallow sea, but there’s a new geography now. Throughout Rankin’s work, these new geographies are multiplied, layered, and complicated by perception, experience, and the sense of aliveness inherent in change.

Sarah Siltala

ALBUQUERQUE, NM

sarahsiltala.com | @sksiltala

represented by Collins Galleries, Cape Cod; Lily Pad Gallery, Watch Hill, Rhode Island; and Sugarlift, New York.

What does “bird watching” conjure in your mind? Old-timers in wide-brimmed hats, binoculars pressed to their eyes? Even if your impressions are dull, you have to admit there’s a certain undeniable glory in this: glimpsing that one bird, in that place you will never visit again, in that singular moment. How you might be looking so diligently for something and then totally astounded when you finally find it.

Sarah Siltala’s paintings are a bit like that, as she herself describes them, like “a bird that alights only for a moment, and then is gone.” Indeed, many of her still lifes include birds—a bluebird perched on a brass-colored bowl, a black-capped chickadee lifting a crisp green leaf while it balances on the edge of a china cup. These paintings represent rare, quickly passing moments, distilled to their sweetest and given a longer lifespan.

Siltala works in the way of the old masters—think Rembrandt, Caravaggio, Vermeer—creating her own oil paints from dry pigments. Yet there are no anguished angels here or desperate humans driven out of Eden. Instead, Siltala accesses and illuminates the heaven that is right here on Earth. Through masterful transitions between light and shadow, and classical color and texture contrasted with contemporary composition, she creates the flashes of awareness that visit most of us infrequently—instances of total presence.

Though human representations don’t show up in Siltala’s paintings, there is a very human intimacy here, the evidence of a hand at work, offering a certain interiority that comes with contemplating the perfection of light spilling across a tabletop, or the last hints of red and blue before the sun completely vanishes beneath the horizon. In her work, Siltala is able to tap into an almost holy awareness of those quiet moments that quickly leave us behind.

Much like the magical desert, Catie Soldan’s images of the desert Southwest hoard enrapturing qualities. Her fine-art photography also stands alone as both art and geological study of some of New Mexico’s most beautiful places.

Originally from Chicago, Soldan, who’s now based in Santa Fe, fuses alternative photography processes with more contemporary technologies to yield exceptional documents. Her various landscape studies—which includes depictions of Shiprock, the Rio Grande Gorge near Taos, and Cerro Pedernal in the Jemez Mountains—partially read as documentary photography in the vein of the United States Geological and Geographical Survey of the American West in the 1870s.

In addition, Soldan’s images, which are one-of-a-kind pieces that can’t be reproduced en masse, aren’t straightforward depictions of mountain crags and cliff faces, but rather bewitching examinations that often align with painting, printmaking, or pen-and-ink drawing. For instance, *Cerro Pedernal Study #19*, a one-off work from 2020 that uses the mordançage alternative photographic process (which coaxes a degraded look from the final product), looks like an abstracted cross section of the striking mesa.

In her landscape studies, Soldan—who earned a BFA in photography from Savannah College of Art and Design (SCAD) in 2011—also utilizes other non-silver tricks such as chromoskedasic sabattier, lumen printing, and solarization, which are then applied to traditional silver gelatin paper for one-of-a-kind results.

“This project involves taking iconic scenes in the landscape and deconstructing them using experimental darkroom techniques,” writes Soldan, who says that her work often touches upon themes of history, memory, and place. “The repetition of subject matter combined with these techniques represent the different emotional qualities in nature. I am interested in exploring what happens to memories when a familiar scene is altered.”

Isadora Stowe

LAS CRUCES, NM

isadorastowe.com | @isadorastowe

Experiencing an installation by Isadora Stowe is like stepping into the inner recesses of the mind. Objects, images, and symbols float off the surface of the wall like free associations passing through one’s consciousness, bathed by dazzling splashes of colored light, only to reappear again in another context, like some kind of uncanny déjà vu.

Stowe’s interests lie in exploring the landscape of the mind as it relates to the physical environment. As an artist from the Southwest, living and working between New Mexico, Texas, and Mexico, Stowe is attuned to the psychological effects of the borderlands, identity formation, and geopolitical tensions of this region. In her work, she focuses on the mechanisms by which we build these concepts in our minds, how we negotiate our relationships with the external world, and construct our identities through the use of symbolism, codes, and everyday objects.

This process takes the form of a “narrative syntax” of objects that she creates and repeats through different media: screen-printing, watercolor, spray paint, stencils, gouache, acrylic, ink, and light-sensitive paint. The circular forms of her paintings on layered Baltic birch wood reference the “cyclical nature of life,” while the repetition of objects and motifs resembles the workings of memory, and allows viewers to make their own connections and associations. “These visions allow us to re-see, reconfigure, and reexamine who we are today,” she writes in her artist statement. The resulting work is an all-encompassing vision and environment, with a visual vocabulary that is both personal and builds on the universal.

Stowe has exhibited widely and is represented in many collections across the country and in Mexico. Stowe is a recipient of the Edwina and Charles Milner Women in the Arts award, which will support her solo exhibition Beacon at Western New Mexico University in 2022.

Josh Tafoya

TAOS, NM
joshtafoya.com | @joshtafoya

Born and raised in Taos, New Mexico, designer and textile artist Josh Tafoya blends traditional patterns and techniques with contemporary fashion in stunning and masterfully crafted designs.

A graduate in fashion design from Parsons New School of Design in New York, Tafoya returned to New Mexico to revive the knowledge of a traditional craft that had been disrupted generationally in his family. Looking to his sheep rancher grandfather and weaver grandmother, Tafoya now practices traditional Spanish weaving on a Rio Grande loom, a style of loom initially brought to the New World from Spain in the 1500s, which was subsequently refashioned and proliferated throughout Mexico and the Southwest. Using wool from the Navajo-Churro sheep, Tafoya creates wearable fashions as well as hanging tapestry works, sometimes incorporating other materials inspired by the landscape, such as discarded bailing twine and burnt, oiled, and blackened willow branches.

In Tafoya’s works, traditional weaving patterns are deconstructed and reconstructed, manipulated and recontextualized into contemporary fashions. Draping the textiles over a form, Tafoya discovers new cuts and silhouettes in the deconstructed shapes, reflecting cultural and ethnic influences, from traditional serapes to punk jackets. Through this process, he explores the idea of “modern constructs of tribalism in identity,” patch-worked together through the interplay of color and pattern, material and technique. The body serves as a performative space for this conversation.

All of Tafoya’s textile works are conceptually compelling, beautifully designed, and impeccably crafted. In his adroitly constructed circular patterned blanket, for instance, we see stunning evidence of his expert skill as a weaver. With his technical know-how in both traditional weaving and contemporary garment construction, along with his ancestral connection to the land and the craft, Tafoya’s works fuse deep traditions with cutting-edge design.

Tafoya’s current and upcoming pieces are available at Maida Goods, and he will be featured later this summer with a photo/video project with Vital Spaces in Santa Fe. ×

by Natalie Hegert
Andrés Mario de Varona’s photographs convey intense pathos and vigor. His images are variously eerie, uplifting, and gritty. They share a deeply thoughtful and moving perspective on human life.

“The camera is my tool to measure cycles of indignation and of healing, as well as our growth as human beings, and as a way to record victories,” says de Varona, whose mother passed away when he was on the cusp of adulthood. “I’ve learned to speak a language true to myself. My mother’s passing helped me discover this. It galvanized my need to know more about who I am and what I can express.”

His photo series Contact surreally documents de Varona’s grieving process. The photos capture moments from ceremonies the family created to explore their shared loss. Rituals incorporate objects that belonged to de Varona’s mother (for example, clothes that were bought but never worn) and otherworldly light effects. The results are at once heartbreakingly personal and universal. Death is “one of life’s few hard guarantees,” he reminds us.

Moving to New Mexico marked a shift for de Varona. His recent series, TRIALS, reflects the artist’s evolving “obsession with life.” Images explore an energetic array of people, questions, and ways of being alive. A suspended mask demands a consideration of identity, which some images ambiguously seem to embrace and others to reject. A woman in a hole may be endeavoring to emerge from or hide in the earth.

Other work explores de Varona’s Cuban roots, the concepts of refuge and shelter, and America’s tragic need to reckon with school shootings. His oeuvre deals with conflict so honestly that it feels urgent to pay attention.

A solo show of Contact x TRIALS at Vital Spaces Annex Gallery in Santa Fe recently came to a close. De Varona’s work has also been shown nationally in Indiana, Colorado, Vermont, Washington D.C., and internationally in Japan and South Korea.

ROSWELL, NM

represented by Corey Daniels Gallery, Wells, Maine; Richard Levy Gallery, Albuquerque

With a stark palette of ice white and coal black, Shoshannah White’s works find poetry in the hidden forces of the natural world, from the workings of the Earth’s climate to the power of electromagnetism. A photo-based artist, White’s practice spans painting, sculpture, and public art installation. Her projects find inspiration in environmental science and the climate, sparked by the interaction of raw materials found on site and the photographic process.

In her latest works, the raw materials of glacier ice and coal enter into dialogue, “two materials formed through compression over time” and “entwined environmentally,” as she describes them. These natural materials signify opposing forces, yet are inextricably bound in her compositions.

Originally from Maine, White has called Roswell, New Mexico home since 2019. Her practice has drawn her to different environments and ecosystems around the world to collect specimens from coal mines and glaciers and to embark on residencies from the forests of New England to Arctic Circle expeditions.

“There are so many ways to enter a dialogue about the climate,” White told photography magazine Ain’t Bad in 2019 while discussing her project Chattermark, a street art initiative that brought mural-scale images of melting glacier ice to public spaces, which were then allowed to weather and deteriorate over time. For White, abstract ideas of climate change and rising sea temperatures become more tangible through an encounter of the senses. “Artists come to the conversation through a channel which activates different pressure points than statistics or data,” she says. An aesthetic experience here holds the key to a transformative experience.

White’s work has been exhibited at institutions including the Center for Maine Contemporary Art, Roswell Museum and Art Center, Maine Jewish Museum, Dickinson College, Bates College Museum, and the George Eastman House. Her work will be shown in an upcoming solo show at Perimeter Gallery in Belfast, Maine.

Izumi Yokoyama’s images feel like memories from a fairy tale (Grimm, not Disney—the kind that can be as terrifying as they are beautiful). A sense of nostalgia for the unknown permeates her work, along with motifs of grace and violence from the natural world.

Born in Niigata, Japan, Yokoyama earned her MFA from San Francisco Art Institute before finding her way to Taos. Stories and environments from Japan and the high desert are strong influences in her work.

“I create intricate line drawings to explore and embrace human struggles within the context of nature,” says Yokoyama. “I am compelled to depict the relationship between living and dying, and the fragile balance between the two, through my subjects.” For example, in *Transformation–Phoenix*, the eponymous bird seems to be crouched in an exhausting and private pain, flames rising from her back against a tent of night.

Transformation is as much destruction as it is creation, the phoenix implies.

Yokoyama’s use of negative space is especially beautiful, conjuring the vastness of our imagination or of the unknown and its mysteries. “With void offering me the opportunity to breathe and process, I meditatively thread the ephemeral and eternal,” says Yokoyama. This is illustrated in *Utopia*, among other works. The drawing depicts a woodland scene with three not-deer. These seem to be deer-shaped holes in the fabric of perception where galaxies swirl and somewhat nightmarish eyes stare back at us as stars (or disregard us completely).

Yokoyama also creates murals, calligraphy, installations, sculptures, and public art projects. Her work has been shown around the United States and in Japan. She received the Image Award at the Taos Fall Arts Festival in 2017 and her exhibitions at Taos’s Harwood Museum of Art have garnered critical acclaim.
