

FOX VALLEY TECH

THE CINDERBLOCK PORTION OF THE EAST-FACING WALL OF THE CAMPUS BUILDING

We are looking for a mural installation on the cinderblock portion of the river-facing east wall of the Fox Valley Tech Riverside Campus building. This space is uniquely shaped but provides a great canvas that is visible from the river and from Highway 44. The right design will honor the work that takes place in this facility while still being an attractive piece of public art for visitors enjoying the riverwalk.
