

PIONEER ISLAND RETAINING WALL

4' 9"

266'

This retaining wall sits on the north shore of Pioneer Island, welcoming boaters into the Fox River from Lake Winnebago. It is a prominent location that, in many ways, serves as the waterway entrance to Oshkosh. We are looking for a concept that complements this natural setting and makes use of this gateway location. Smart plans will also consider the history of this location.
