OPERATOR CLASS

ypes.Operator): X mirror to the select ject.mirror_mirror_x" ror X"

Employees across every age group are bringing their own AI tools to work.

Microsoft Enterprise Survey May 2024

85%

Gen Z

(18 - 28)

Share of survey respondents who are using AI tools at work not provided by their organization

2024 Work Trend Index Annual Report trom Microsoft and LinkedIn

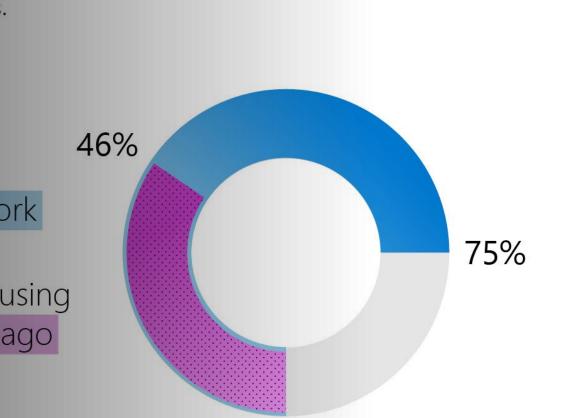

Usage nearly doubled in the last six months.

75% of people are already using AI at work

46% of them started using it less than 6 months ago

Survey question

Are the generative artificial intelligence (AI) tools you use at work provided by your organization?

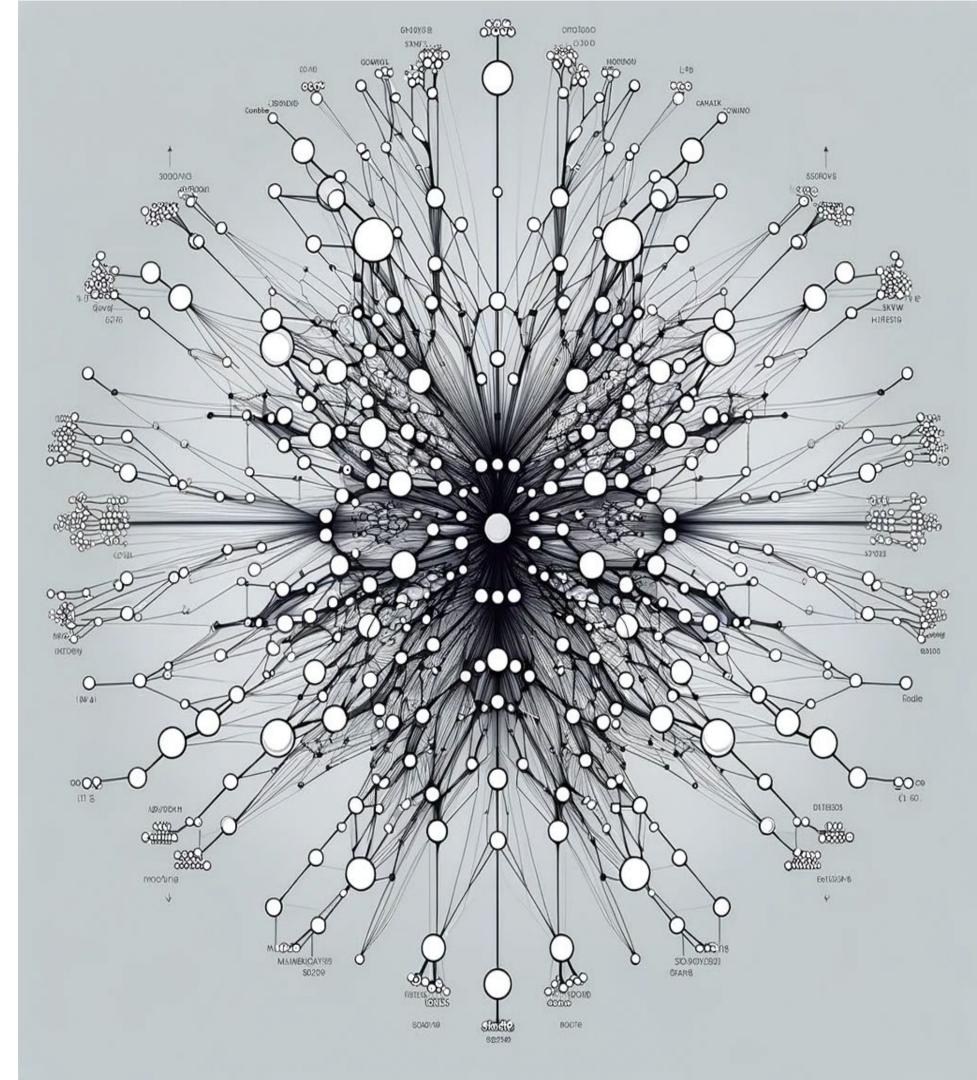

What the heck is this?

- Neural Networks \rightarrow LLMs \rightarrow NLP \rightarrow **Generative AI**
- Predicative Engines
- Conversational Overlay

Basic Vocabulary

- GPT/LLM
- GPT vs "a" GPT
- Model
- Weights
- Training
- Context
- Prompting
- Fine Tuning
- Weights
- Tokens
- Hallucination
- Open Source / Closed Source

- LLMs
 - Chat GPT (MSFT Copilot)
 - Claude
 - Gemini
 - Perplexity
- Image Models
 - Dall-E
 - MidJourney
 - Ideogram
 - Firefly

PLAY1: AMPLIFYWHAT YUAREAREADYDING

Set your people (and their productivity) free

Goal: All staff to really use these tools (not just play around) for 10 dedicated hours to understand the limits and the workflows

Tools:

- GPT-4 (paid) / Team GPT • GPTs (lots of them!)
- Browser plug-ins for summarization
- Duet (Google); Copilot (MSFT)
- Easy image manipulation (Pixlr; Adobe Firefly)
- GitHub Copilot

Zone of Amplification

What you know

Zone of Expansion

What the LLM *thinks* it knows

Here there be

GTHBCOPILOT

Copilot (Github-\$10-\$19/month)

- Copilot
 - Inline code suggestions (autocomplete)
 - Auto fix errors
- Copilot Chat (@Workspace)
 - Interact with your codebase
 - Explains code functions in natural language
 - Verbally "talk" to code
- Benefits
 - Speed
 - Ideation/Problem solving
 - Focus on critical (hard) issues

PLAY2: GENERATECONENTEAST SIXBLOGS AMONTH? TRY50.

You no longer have an excuse...

- Written Blogs, website content
- Video Text to video, avatars, translation
- Audio Text to Audio, transcription, translation
- Visual- Generative fill, image correction, art, creative elements

Goal: Assess what content you are creating, inject A into process

This is what "Early Days" look like:

PLAY3: AUTOMATESAIES

Sales Will Be:

- Personalized
- Well informed
- Precision-coached

Sales execution and onboarding will be largely automated

Goal:

- Identify what your CRM is doing in AI and use those tools;
- Amplify sales staff with IIM training and tools

The promised land of fully automated sales is not here yet...

Create a friendly robot that represents business sales automation

PLAY4: COLABORATEWIHDATA TESTHYPOIHESES, CHASEIDEAS

What would you ask your data if you could?

Use Cases:

- Lead scoring
- Data restructuring
- Forecasting
- P&L Analysis
- Fraud risk detection
- Churn prediction
- Sentiment

Tools:

- GPT
- akkio.com
- pecan.ai

Goal: "Question" the data sets instead of tasking staff

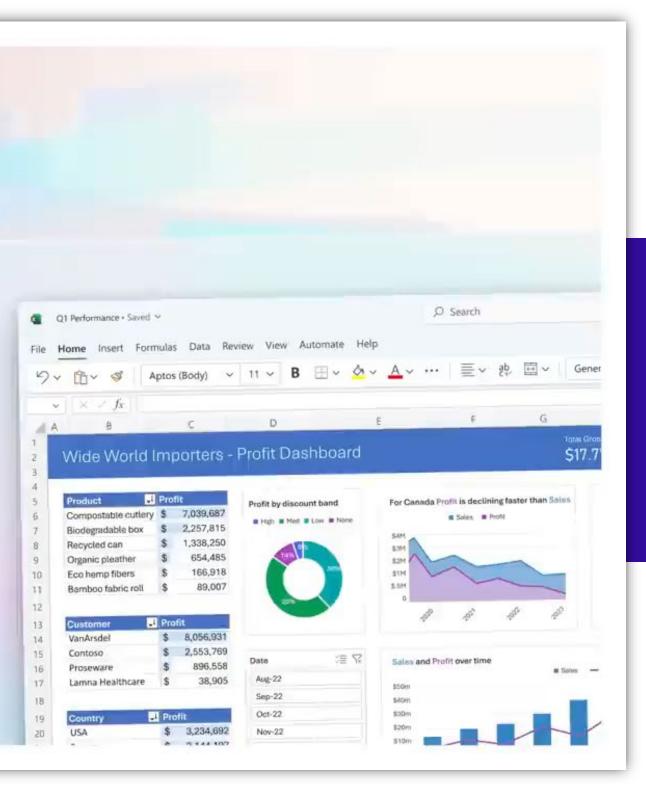

adorable robot looking at data with a magnifying glass. Include charts, graphs and other elements of business intelligence

PLAY4: COLABORATEWITHDATA

What would you ask your data if you could?

Copilot in Excel

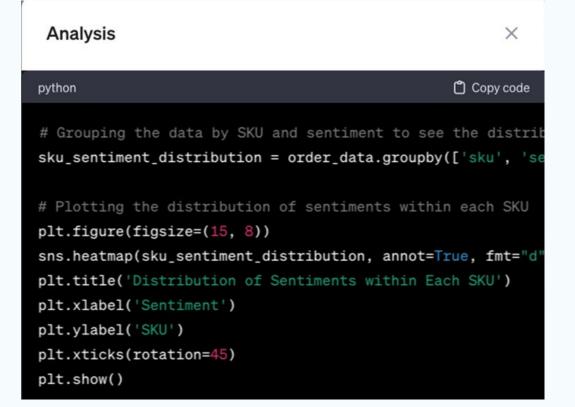

MICROSOFT 365

TEST HYPOIHESES CHASE IDEAS

PLAY4: COLLABORATEWIHDATA

- Unstructured Data
- Qualitative Information
- Automate Python and SQL

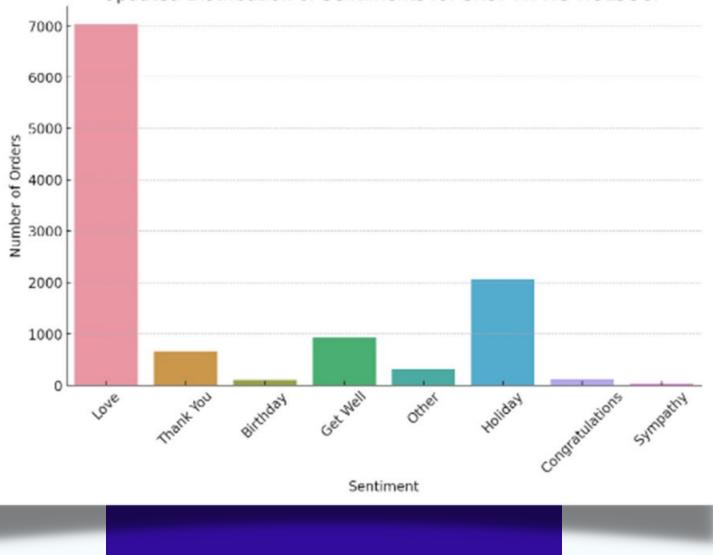

Goal: "Question" data sets instead of tasking staff

Data Analyst Understood. The "Love" sentiment category was initially considered based on phrases in the entire message, which could include closings like "Love, [Name]". However, to make the analysis more accurate and focused on the intent of the gift rather than the closing signature, I will modify the categorization criteria for "Love" and reanalyze the data. This time, I'll focus on interpreting "Love" based on the content of the message excluding typical closing signatures.

Let's re-categorize the sentiments with this new approach and then reanalyze the SKU 'VR-WS-HOLSOUP'.

2

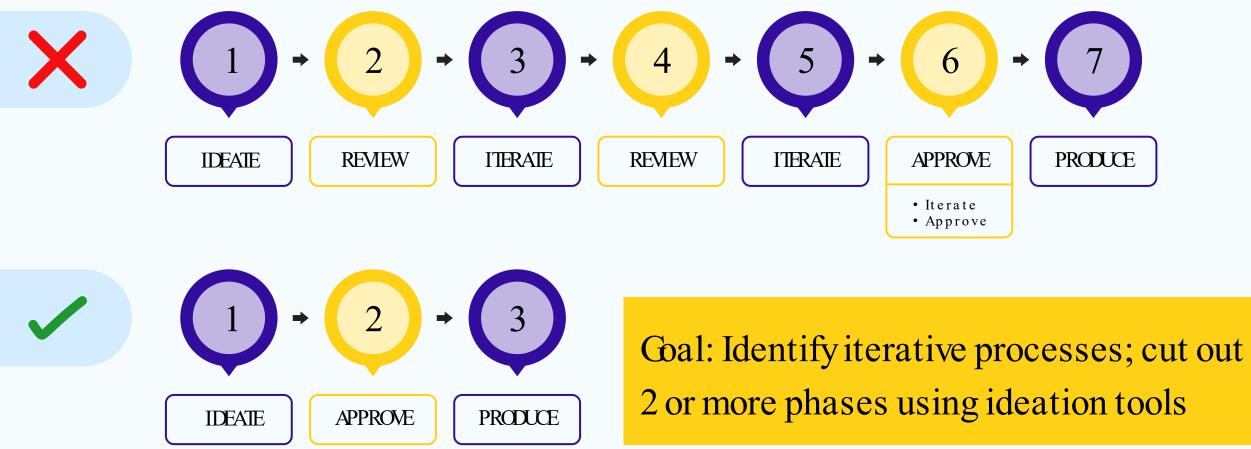

Updated Distribution of Sentiments for SKU: VR-WS-HOLSOUP

PLAY5: ACHERATECXIES

Your creative and feedback timelines are all too long. Shorten them.

- Anything creative should essentially go from ideation to choice
- Staff should be proof testing concepts, ideating and iterating proactively, not reactively
- Code feedback is now immediate... but must be used!

create an image for a presentation dynamic and energetic friendly robot with very long legs, enthusiastically stepping over an enormous gap, set against a white background.

PLAY6: ENABLEAPERSONAL CAPILRE YOR MEETINGS!

What would the you of tomorrow regret not capturing today?

Microsoft <u>Virtual Agents</u> and <u>Google Notebook LM</u> are LIVE (in beta). If you aren't collecting transcripts and other data, you could regret it

Goal: Integrate a transcription chatbot in your workflow

*Laws vary. Walk carefully...

create an image for a presentation that is a robot acting like a vacuum sucking up information. White background. Friendly

PLAY6: ENABLEAPERSONAL CHATBOT

Name

Josh's Head

Description

Add a short description about what this GPT does

Instructions

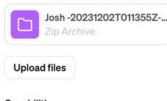

The goal of this GPT is to assist Kevin, a coach, in improving his coaching sessions with his client, Josh. The GPT will analyze the coaching conversation documents between Kevin and Josh to identify themes, language, and areas of focus, with a special emphasis on actionable items that Josh prefers. The GPT will provide insights on past sessions, suggest conversation strategies, and offer customized advice to enhance the effectiveness of future coaching sessions. This GPT will concentrate on identifying opportunities for actionable advice, ensuring that the suggestions are practical and directly applicable to Josh's needs. It will also help Kevin understand the dynamics of his coaching style and how it can be adapted to better suit Josh's requirements. The GPT will not disclose the content of the coaching sessions but will use the insights derived from them to inform its responses.

CAVEAT(S)...

- This is still very new
- Hallucinations are real and insidious
- Your data might not be safe... at all
- Your staff is already using a lot of these tools... are they doing so intelligently?
- Regulatory change is coming
- The pace of change is incredibly rapid, be careful of investing too much in a particular platform or approach

I'm sure Disney won't mind...
