I am so happy to get a response from you. I live at 210 Wenonah place. I just bought this amazing historical home I adore in September I had no clue about the noise.

When mr Trump is here it's great as the planes are detoured but as I thought others are now complaining.

Here is my suggestion.

As much as possible have the plane fly out and land from the west where property value are less

If they must go east then rotate the route each day. It's absolutely not fair that because we are in the shortest path we have to listen to hundreds am not kidding huge jets and small planes in such amazing historical palm beach neighborhood. The pilots can fly the planes in other directions and they can be on a rotating schedule. 1/2 day here 1/2 there and so on with alternate path in between so everyone has a share of the burden. We all pay high taxes. There has to be a solution to this. The pilot and air traffic controller have no clue of what they are creating in our houses. It's not acceptable. I put my house on the market but if you solve this I will keep it. I adore living here.

Am an architect

My name is Louis Bond

And my number is 305-409-2809

I prefer this to remain confidential as the main reason am selling the house is that am now working in Miami. But with the train coming if you resolve this air traffic issue. I will keep my house.

It's very very loud. Am not exaggerating plus there are no incentive for triple pane windows that might help. You can't watch tv or work at home in peace.

Thank you very much.

Louis

General Information	
First Name:	L
Last Name:	B
Email:	Lbworld@me.com
Comments:	I wrote here 2 times already zero reply zero concerns. What is this? A third world country or palm beach. How come you can have the jets fly away from trump path high enough and on an acceptable man et when he is here and other days the jets are 1000 feet up from our roof in the Central Park south lake park area historic district. It is unacceptable. Fly the planes higher or west. Thank you.
