Comments:	Is there a way to find out if engine testing is being done at the north county airport by Pratt & Whitney or other companies? It seems like there is a dull roar in the nighttime hours being heard around PGA Blvd and Central. Thank you.

Good Morning,

Thank you for your comments.

I have spoken with Signature Aviation at the North County Airport and they have verified that there is no engine testing or run-ups being performed during the night-time hours.

Pratt & Whitney maintains a private facility and we would not have any information on their activities.
Again, Thank You
