PALM BEACH COUNTY GLADES AIRPORT

Palm Beach County Glades Airport is located on the eastern shore of Lake Okeechobee, about 40 miles west of West Palm Beach. The airport has one runway that measures 4,116 feet. The airport can accommodate twin-engine general aviation aircraft.

The airport primarily supports recreational flying, agricultural spraying, and flight training. The airport also supports environmental patrol and law enforcement aviation. Recreational uses at the airport include skydiving and paragliding. The airport offers a convenient location for flight training. Professional coaches often use the airport when traveling to the area for recruiting. The airport also has one fixed base operator (FBO) that serves both local and transient users.

Previous versions of this Study used different terminology to communicate results. The following terms were updated: Direct Impacts changed to On-Airport Impacts and Indirect Impacts changed to Visitor Spending Impacts.

Florida's Statewide Benefits From Aviation

Florida realizes significant economic benefits from aviation. The Florida Department of Transportation completed a comprehensive economic impact analysis to measure these benefits. Benefits measured in the FDOT study considered on-airport impacts, visitor spending impacts, and multiplier impacts.

Florida's 129 public-use airports (including 20 commercial service facilities) are a major economic engine of the State's economy. The aviation system keeps Florida connected to the global marketplace while simultaneously driving local economies. Florida's airports provide space and infrastructure for important activities such as manufacturing, logistics, tourism, and emergency response. Below is a summary of the total statewide economic impact as well as the impact of District 4.
