Ms. Rohan,

The patterns in and out of PBI A have not changed.

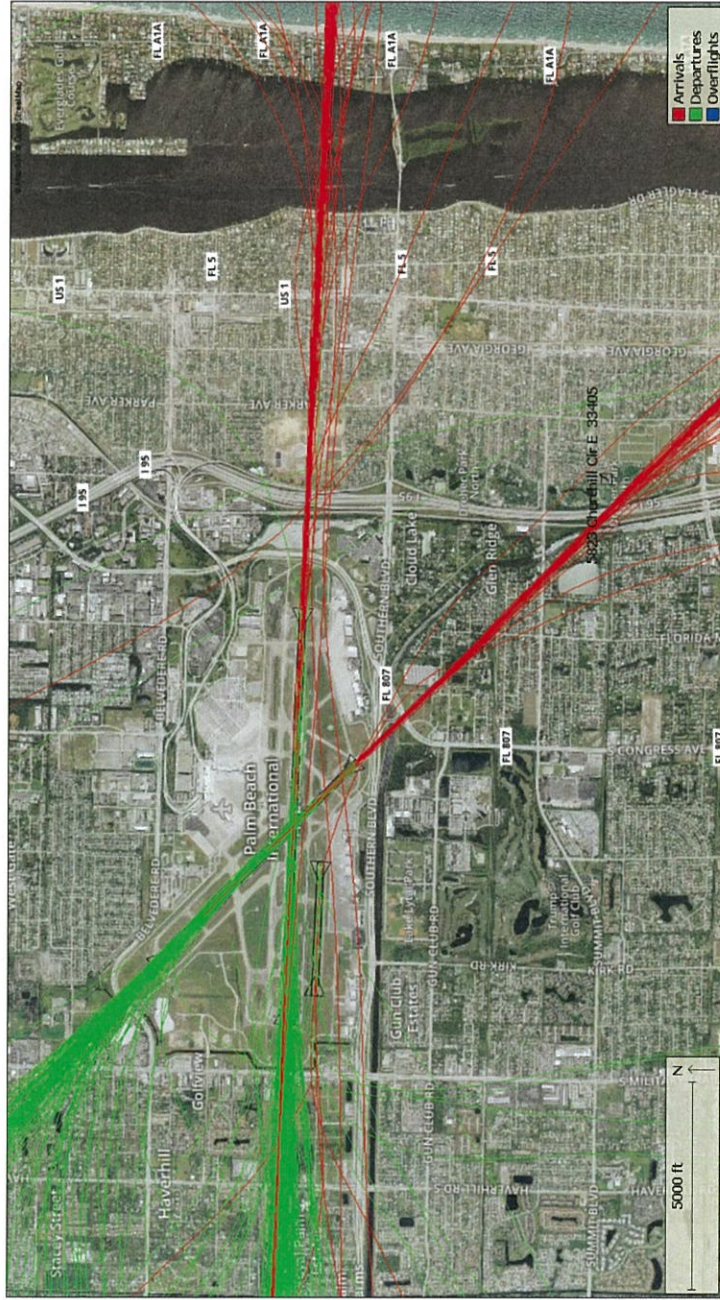

The traffic you have been observing is due to the use of the crosswind runway 14/32 which extends from the NW diagonally to the SE. This runway remains an active runway but is used less often than the main runway.

Thank you for your comments.

Comment and Suggestion Form

General Information	
First Name:	Carrie
Last Name:	Rohan
Email:	carriekrohan@aol.com
Comments:	I live at 5823 Churchill circle west and I have lived here since 2001 . As of the election the planes are continuously flyin for landing over my house. They keep me awake at night and are a nuisance. Why is this happening. I would like a call back or response to this situation asap. I have been keeping records also. I'm concerned about my property value decreasing also. This was a quiet neighborhood but no more. Thanks for your quick response .. Carrie Rohan
