Mr. Beautyman,

There has not been a change in flight patterns. You will observe traffic over your area when RWY 14/32 (the crosswind runway) is in use.

This runway is not utilized as often as the main runway but remains a useable surface and is used when the winds dictate.

Thank you for your comments

<b>Comments:</b>	Landing routes should be changed back so planes land from the east. Currently, planes are landing from the southeast, which is bringing low-flying planes over a densely populated residential area. Children cannot sleep. Animals are disturbed. The old route from the east allowed planes to descend over the ocean and only a few houses were affected.
