“Trees are Treasures”

Imagine you are in a lovely warm hot tub, and you admire the beautiful oak tree. This is a beautiful oak tree you admire with your friends and family. First of all trees give you that oxygen. If you have oxygen, then you can stay healthy. For example you can do many things with trees. Three of them are going hiking, going to the spa, doing tree climbing, and camping. Now you know trees have many magnificent perspectives. Trees are treasures.
