PORT EVERGLADES TARIFF NO. 12

Item No. 445−Bunkering.

Issue No. 11

Effective Date: October 1, 2026

Vessel bunkering includes, but is not limited to, the transfer of liquid petroleum products, alternative fuels (including, but not limited to, liquified natural gas, methanol, ammonia, biodiesel, and hydrogen), and derivatives for fueling, lubricating, or other associated uses to a vessel as distinguished from loading such products as cargo.

All vessel bunkering must be performed by a Broward County franchised entity authorized to perform such services at Port Everglades and in accordance with all applicable regulatory requirements.

All vessel Berths numbered 2 through 27 are accessible to pipeline hose connections for bunker fuels. These Berths, as well as Berths 28 through 33, are accessible by tank truck and barge.

Written reports of activity must be submitted monthly within five (5) Business Days after the end of the month, to the Port Everglades Department Petroleum Section and must include the dates of services performed, the name of the vessel(s), and the source and number of gallons of product transferred by type. Late submission of the monthly report is penalized at the rate of twenty-five dollars ($25.00) per Business Day, or portion thereof, for every day the report is submitted late or remains incomplete.

No Wharfage will be charged on bunkers delivered across Port Everglades' docks by pipeline or truck.

No Wharfage will be charged on bunkers delivered to vessels within Port Everglades by barge on which Wharfage has previously been paid on the inbound movement of the bunker components.

Bunkers delivered directly to vessels within Port Everglades by barge on which Wharfage has not previously been paid will be subject to charges at the same rate as specified under Tariff Item No. 520, only if one (1) or more liquid bulk storage tanks for the product exist within the Port, regardless of whether such storage tanks are currently available for use.
