

#### What

The Tourism Sustainability Commitment aims to ensure economic, environmental and social sustainability becomes a genuine ethical underpinning of our industry.

Developed by industry for industry, it establishes 8 industry-level sustainability Goals and 14 Commitments that individual businesses can achieve to help the industry reach the Goals.

#### Who

Any New Zealand tourism business or organisation can sign up to the Commitment. There is also an opportunity for organisations and businesses outside tourism to come on board as endorsers.

We want every tourism business in New Zealand to commit to operating sustainably by 2025. The greater the buy-in, the more powerful it will be.

"Sustainability has to be a word, concept and a set of actions that are a part of every tourism business in New Zealand."

### 4 Elements & 8 Industry Goals

### **Achieving Economic Sustainability**

- Goal 1: \$41 billion total annual tourism revenue by 2025
- Goal 2: Tourism businesses are experiencing sustainable growth through ongoing profitability, innovation, quality improvement and investment

#### **Achieving Visitor Sustainability**

- Goal 3: International and domestic visitors' experience of NZ overwhelmingly meets or exceeds expectations.
- Goal 4: Tourism businesses actively engage with their visitors to ensure that the visitor experience is enhanced and adverse impacts are reduced.

#### **Achieving Sustainable Host Communities**

- Goal 5: New Zealanders are happy with the level of tourism activity and support growth
- Goal 6: Tourism businesses are desirable and responsible employers and leaders in engaging and supporting vibrant communities

### **Achieving Environmentally Sustainable Tourism**

- Goal 7: Tourism businesses actively support and champion ecological restoration initiatives
- Goal 8: Tourism businesses are measuring, managing and minimising their environmental
- footprint.

### The 14 Commitments

#### **ECONOMIC**

#### HOST COMMUNITY ENVIRONMENT

- Focus on long term financial performance.
- Undertake customer satisfaction monitoring, evaluation and reporting.

VISITOR

- Pay a fair wage to all staff.
- Contribute to ecological restoration initiatives.

- Invest capital to grow, and/ or to improve quality and productivity.
- Innovate to improve or upgrade our offering to enhance visitor experience.
- Support our workforce to flourish and succeed.
- Have carbon reduction programmes towards carbon neutrality.

- Innovate and have effective strategies to mitigate the effects of seasonality.
- Educate visitors about New Zealand's cultural and behavioural expectations.
- Actively engage with the communities in which we operate.
- Have waste reduction and management programmes.
- Have socially and environmentally sustainable supply chains.
- Engage with our visitors and communities on the importance of restoring, protecting and enhancing New Zealand's natural environment.

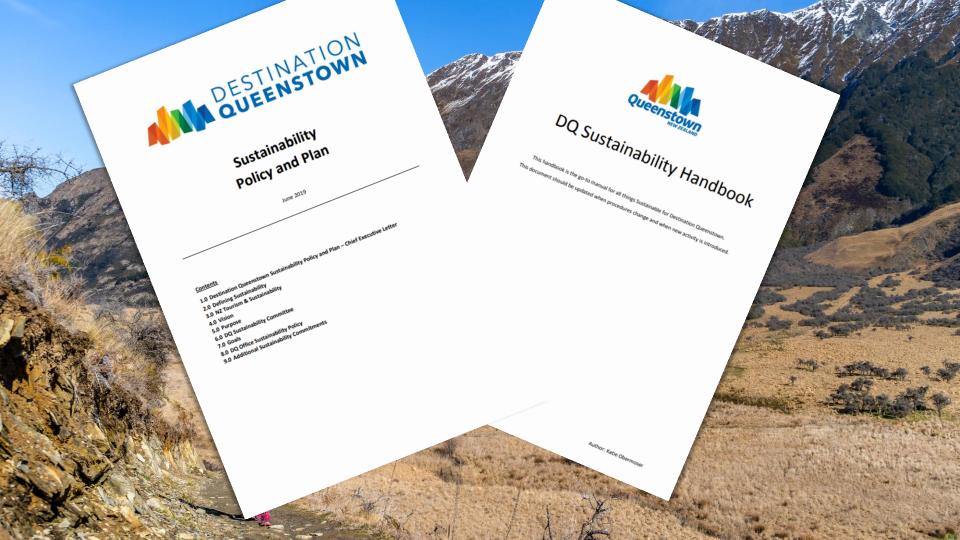

## Step 1. Getting Buy-In

- Talk to your team
- Brainstorm ideas
- Get agreement to commit together

## Step 2: Set up a Committee

#### **Agenda Items of first session**

#### Defining the committees purpose

• 'To drive and manage DQ's sustainability efforts by implementing initiatives that focus on the environmental, cultural, ethical, social and economic dimensions of operating.'

#### Sustainability Committee Goals

- To apply sustainability principles to the operation of our office
- To apply the New Zealand Tourism Sustainability Commitment to our Organisation
- To support the Tiaki promise
- To encourage DQ members to embrace the commitment and promise (education)

#### Starting to set goals

 Which if the 14 commitments can DQ as an organisation implement and what would actions look like?

# **Applying the Commitments**

### **DQ Policy and Plan**

- A letter from the Chief Executive
- Definition of Sustainability

Broadly speaking sustainability can be defined as meeting the needs of the present generation without compromising the ability of future generations to meet their own needs.

- Blurb on the role sustainability plays in tourism
- Our vision

To champion sustainability to make a vital contribution to the overall betterment of Queenstown

Our Purpose

To establish and promote sustainable practice into all of the organisations activities

Our Goals – I mentioned earlier

# **Policy Principles**

- To minimise environmental impacts in the area of waste
- To conserve office energy
- To apply the commitment
- Promote Tiaki

### TIAKI PROMISE

WHILE TRAVELLING IN NEW ZEALAND I WILL

CARE FOR LAND, SEA AND NATURE, TREADING LIGHTLY AND LEAVING NO TRACE

TRAVEL SAFELY, SHOWING CARE AND CONSIDERATION FOR ALL

RESPECT CULTURE, TRAVELLING WITH AN OPEN HEART AND MIND

### HOW TO

CARE FOR NEW ZEALAND

KEEP NZ CLEAN

BE PREPARED

## Handbook example

Minimising environmental impacts in the area of waste Actions

#### Keep Cups

295 million cups of takeaway coffee are purchased a year in NZ. Paper cups are often lined with plastic and can't be recycled and in regard to the lids, recycling is a buy-sell market – if no-one wants to buy plastic, no-one's going to collect it therefore avoiding using takeaway cups is the most sustainable approach to coffee consumption.

- The Organisation will provide staff with a space in the kitchen to store their keep cups, as well as facilities to clean cups after use.
- There are a few spare cups in the kitchen for use when personal cups have been forgotten or to offer guests / visitors.

#### Individual rubbish bins

Our individual office rubbish bins have previously been lined with plastic bags. Weekly we were potentially adding 16+ plastic bags to landfill.

- · Plastic bag liners have been removed from individual rubbish bins.
- Food scraps are to be disposed in the compost bin in the kitchen.
- Recycling can be disposed in the blue bin beside the photocopier.
- Be aware that if you use your bin to collect recycling, it needs to be emptied by you by EOD
   Friday, or the cleaners will dispose of your recycling in the landfill bin.
- Suggestion: collect paper recycling in a tray and use the rubbish bin for clean landfill

## Handbook example

#### Composting

Organic waste that is buried in landfill does not receive oxygen and will produce methane (a greenhouse gas), whilst a compost pile undergoes aerobic decomposition and will produce far less methane than landfill.

- A metal pedal bin is in the kitchen to collect compostable materials such as food scraps.
- The compost bin must have its lid closed at all times.
- The compost bin will need to be emptied at least once a week.
- The compost is taken to the Queenstown Playcentre, Stanley Street to be emptied every Friday.
- If you see the bin becoming full let Member Services know.
- Compost rules: avoid meat scraps, citrus peels, tea bags, fruit labels, onions peel.

#### Recycle all possible plastics, paper and glass

Approximately 252,000 tonnes of plastic waste is disposed of to NZ landfills each year (based on 8% of 3.156 million tonnes of waste to landfill). Not all plastics are recycled. Some types (PET (1) and HDPE (2)) are easier to recycle than others. Some plastic types (3,5,6 and 7) are simply not worth recycling. There is low value in the recovered plastics because they are harder to recycle and/or manufacturers struggle to make any profit from them.

Using recycled glass bottles and jars in the manufacture of new glass containers provides energy savings and reduction in carbon dioxide emissions to conserve nature resources. Glass is uniquely sustainable as it can be recycled again and again without loss in quality, purity or clarity.

- Think before you buy consider packaging when purchasing
- There are 3 collection points for recycling in the office.
  - The blue bin beside the photocopier NO GLASS
  - The yellow bin under the bench on the window side of the kitchen NO GLASS
  - A blue bin beside the cleaning cupboard FOR GLASS.
- Member Services empties the yellow kitchen bin into the large blue recycling bin weekly and takes the blue bin in and out for collection along with the separate glass bin.
- Please ensure kitchen recycling is clean before being placed in either bin.
- Please take the effort to break down large boxes to ensure there is space for other items.
- · Items that can be recycled
  - Plastics 1-7. Washed, not squashed and lids off.
  - Steel tins and aluminium cans. Washed.
  - Empty aerosol cans.
  - Clean aluminium foil.
- Recycling No-no's
- · Plastic bags or cling film.
- Pesticides, oil or hazardous chemicals.
- Pyrex, ceramics, window glass or broken glass.
- Materials contaminated with food.
- Plastic or metal binding.
- Wax coated or foil lined cartons, for example milk or juice cartons
- Polystyrene.
- Glass bottles and jars. Washed with the lids off (the lids can also go in the recycling container).
- Clean paper and cardboard. For example office paper, magazines, newspaper, egg cartons, cereal boxes, envelopes.
