

Short term visitation

30 Day Forward Outlook

Overview

Destination Queenstown has developed a 30 day forward outlook chart indicating the current levels of accommodation occupancy in Queenstown. This is based on collated information from multiple data sets covering commercial and non-commercial accommodation. The 30 day forward outlook chart is weighted 80% on currently booked forward occupancy rates and 20% on predictive forward booking data.

The objective of this 30 day forward outlook chart is to assist local tourism businesses like activities, attractions, retail, bars and restaurants to manage their operating days/hours, supply and staffing in alignment with the forward outlook.

Frequency

DQ will publish the report at the end of the month for the upcoming 30 day period included in the Visitor Demand Mapping Resource. There will be weekly refreshes of the forward outlook chart which will be posted in the DQ Member (Visitor Demand Mapping) area of the DQ website. Click HERE to access previous outlooks.

Feedback

For feedback, more information or clarifications about the content below or if you are interested in supplying your accommodations data toward the dataset please contact Kiran Nambair.
