

# 90 Day Forward Outlook for Queenstown

*Published on Friday 20 August 2021*

# Short term visitation

## 90 Day Forward Outlook

### Overview

Destination Queenstown has developed a 90 day forward outlook chart indicating the current levels of accommodation occupancy in Queenstown. This is based on collated information from multiple data sets covering commercial and non-commercial accommodation. The 90 day forward outlook chart is weighted 80% on currently booked forward occupancy rates and 20% on predictive forward booking data.

The objective of this 90 day forward outlook chart is to assist local tourism businesses like activities, attractions, retail, bars and restaurants to manage their operating days/hours, supply and staffing in alignment with the forward outlook.

### Frequency

There are weekly refreshes of the forward outlook chart which will be posted in the DQ Member (Visitor Demand Mapping) area of the DQ website. Members will receive fortnightly reminders through Special Remarks communications. Click [HERE](#) to access previous outlooks.

### Feedback

For feedback, more information or clarifications about the content below or if you are interested in supplying your accommodations data toward the dataset please contact [Kiran Nambiar](#).

### Data Sources

#### DATA SOURCE

STR FORWARD  
STAR

AIRDNA – FUTURE DEMAND  
ANALYSIS

AIRDNA

#### INFORMATION

Based on real occupancy on the books from a set of 15 properties. Free to submit data if you are part of STR.

Forward looking occupancy rates (actuals) in a set of over 1,800 active alternative lodging properties in the wider Wakatipu basin.

#### DATA SOURCE

OTA  
INSIGHTS

OTA INSIGHT

QUEENSTOWN  
INTERNATIONAL AIRPORT

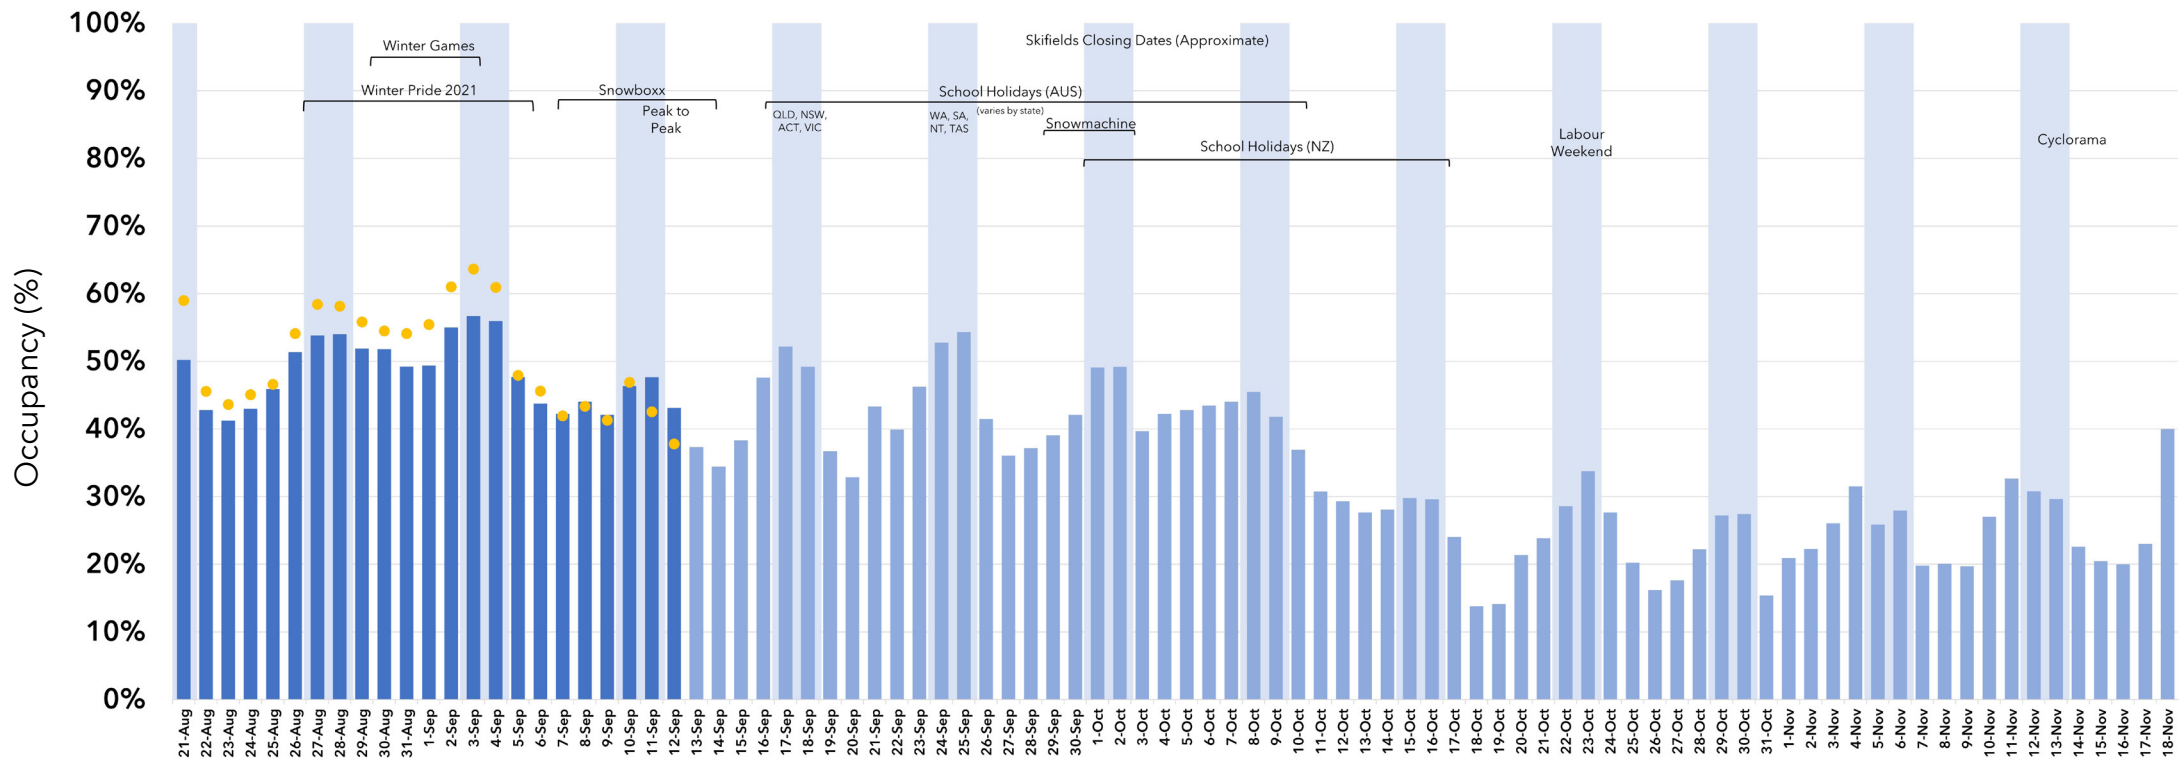

#### INFORMATION

Market intelligence capturing booking intent in real time. Takes into account OTA, GDS, alternative lodgings. Gives a "heat" map.

Weekly seat capacity growth compared to same week last year. Updated monthly.

# Short term visitation 90 Day Forward Outlook

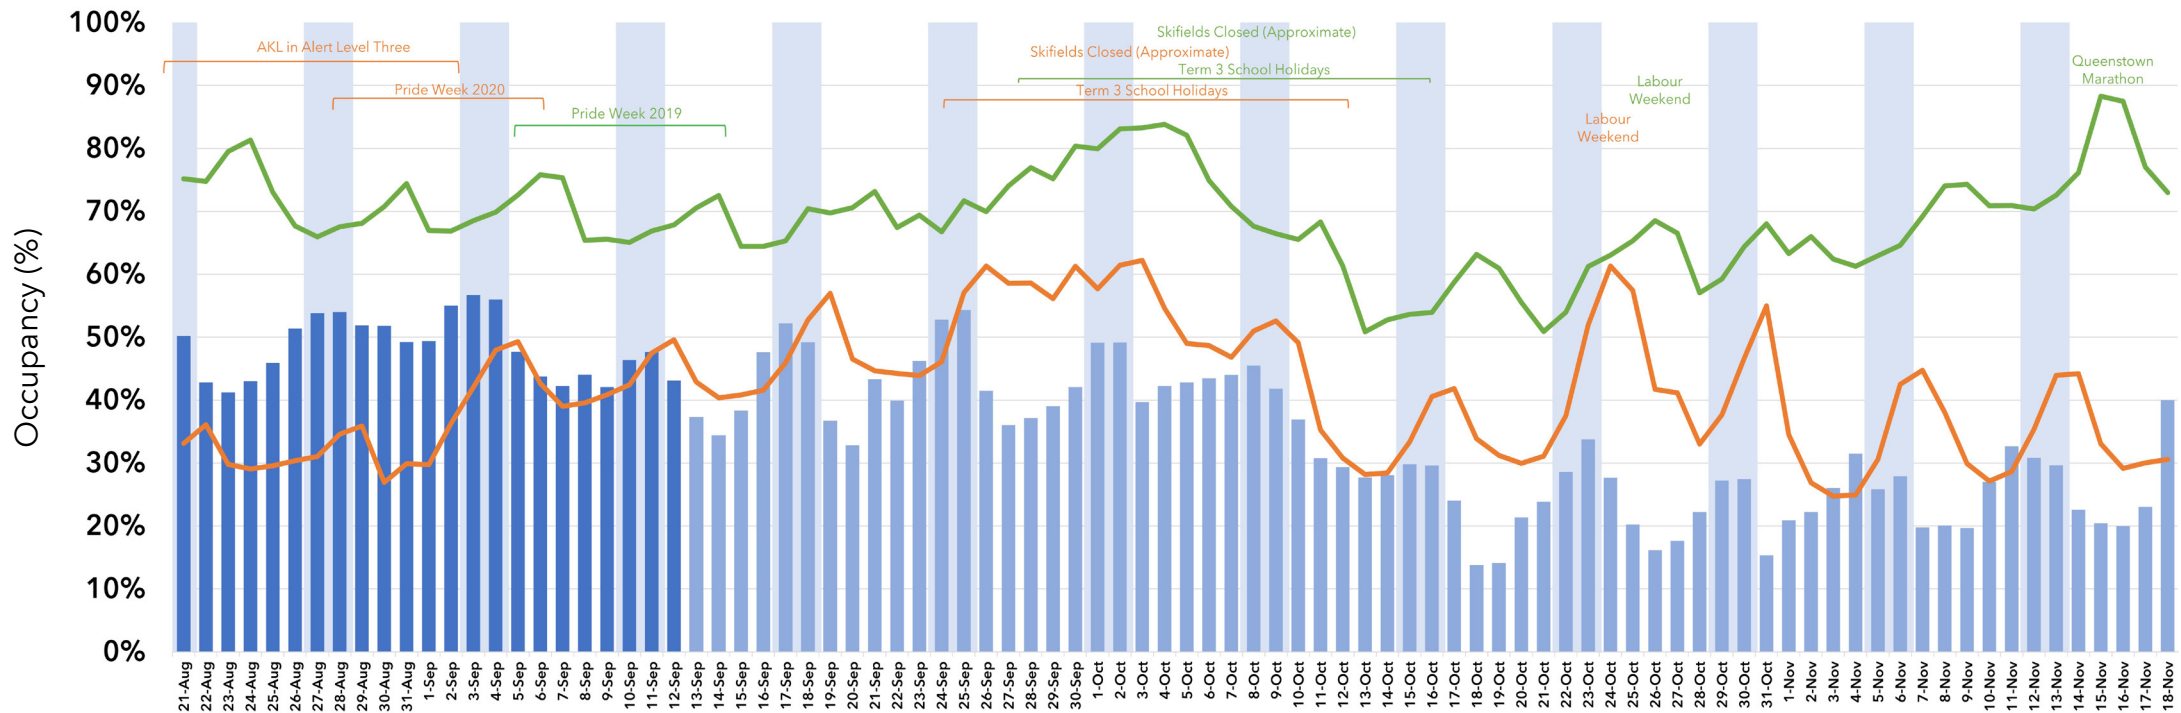

**PLEASE NOTE THAT DUE TO TIME LAG ON THE COMMERCIAL DATA WHICH IS COLLATED ON 17 AUGUST THIS PUBLICATION (20 AUGUST) WILL NOT COMPLETELY CAPTURE THE IMPACT OF THE LEVEL FOUR ALERT LEVEL CHANGE. PLEASE CHECK NEXT WEEK (27 AUGUST) FOR A CHART THAT REFLECTS THIS.**
