Success story – SENEDIA *“the Silicon Valley of undersea technology”*

- The defense/undersea technology cluster has an annual economic impact of \$3.7 billion.
- Used cluster grant funding to perform an analysis of the Navy & Defense Advanced Research Project Agency (DARPA) budgets focusing on areas pertaining to undersea technology and cybersecurity.
- Conducted outreach to industry through workshops – briefing them on the intelligence data and how they can use it to develop a strategic capture plan.
- Project is roughly 90% complete.
