

**BrachyClip, Inc. | North Providence | \$64,800 | Manufacturing Voucher** | BrachyClip, Inc. has developed a novel brachytherapy application system that advances minimally invasive radioactive cancer treatment. BrachyClip will engineer and produce tooling for the next iteration of biocompatible clips used in the application system. The BrachyClip system can improve treatment precision and patient outcomes.

**Moss Pure | Smithfield | \$75,000 | Manufacturing Voucher** | Moss Pure has developed a bioengineered living moss technology that can be used for a variety of applications as air filters and interior décor. With voucher funding, Moss Pure will develop and test its living moss technology in a new product design as turf, disrupting the artificial turf market, and offering a sustainable and eco-friendly alternative.
