

Small Business Risk Reduction to Natural Hazards & Extreme Weather in Rhode Island

A Guide for

CONSTRUCTION SERVICES

SOME THINGS TO KNOW

This guide is targeted at businesses that own or manage brick and mortar, or off-site food preparation and service operations.

- This guide is meant to suggest actions to reduce risk to your business. However, the success of these strategies will be site dependent, and cannot be guaranteed.
- Each business is different; always consult with your local building official before starting a construction project.
- In most communities, if a project costs 50% or more of the value of the structure, “Substantial Improvement” requirements in the building code are triggered. This requires the property to be brought into compliance with the most up-to-date municipal floodplain management code.

IMPORTANT DEFINITIONS

Natural Hazards = Extreme weather events that can cause damage. Examples include hurricanes, floods, blizzards, or severe wind.

Business Features = The many parts that make a business run. By looking at how a hazard affects each feature, you can take focused steps to reduce risk.

Vulnerability = Business features that make your business more likely to be impacted by a natural hazard.

Risk = The level of exposure that a business has to a certain hazard. Higher vulnerability and a frequent natural hazard create higher risk.

Resilience = The ability of a business to “bounce back” after a severe event. It is how much individuals, institutions, and businesses can survive, adapt, and grow no matter the weather events they experience.

HOW TO USE THIS GUIDE

**Consider Key
Business Features**

Page 3

**Identify
Vulnerabilities
and Strengths**

Page 4

**Select Risk
Reduction
Strategies**

Pages 5 - 6

**Consider
Insurance Options**

Pages 7 - 8

**Useful
Resources**

Page 9

CONSIDER KEY BUSINESS FEATURES

2

DOCUMENTS & RECORDS

Documents, IT, or records that are located on a job site may be vulnerable to damage or loss during a natural hazard event.

3

BUSINESS SITE

A natural hazard event may render the construction site unusable, or slow work progress, by causing erosion and landslides, or depositing material or debris.

1

ACCESS

A construction site may become inaccessible due to blocked roads. This may impact employees, subcontractors, and supply chain deliveries.

4

EMPLOYEES & VENDORS

Employees may be unable to access or leave the site, or be in harms way, during a hazard event. Relying on outside vendors may also increase risk.

7

3

SITE UNDER CONSTRUCTION

7

INSURANCE

Your policies should cover the site, structure, business interruption, equipment, and outdoor items against disasters, including floods.

5

INVENTORY & STORAGE

Construction materials can be damaged or lost from flooding, high winds, or severe storms. Outdoor items can also become dangerous debris.

6

UTILITIES & EQUIPMENT

Construction tools, equipment, and site utilities can be at risk of damage during an event, causing long-term disruption or temporary closure.

IDENTIFY VULNERABILITIES AND STRENGTHS

Vulnerabilities

Strengths

1

ACCESS

Is access essential for customers, employees, others? How often is it blocked?

- ☐ Low-lying roads get flooded
- ☐ High tree cover over roads

- ☐ Multiple routes of access
- ☐ Can operate remotely or offsite
- ☐ Easily accessible on foot (good sidewalks)

2

DOCUMENTS AND RECORDS

How are documents stored? Is information management a specific service?

- ☐ Hard-copies
- ☐ Located on-site

- ☐ Electronic copies
- ☐ Stored on "the cloud" and/or offsite

3

BUSINESS SITE

How important is the site to operations? How vulnerable is it to damage?

- ☐ Near coast or river, in mapped flood zone
- ☐ Sources of risk (like trees) on site

- ☐ Located uphill, out of flood areas
- ☐ Structural protection in place on site

4

EMPLOYEES AND VENDORS

Can employees work remotely? Do you rely on third party vendors?

- ☐ Staff do not live locally
- ☐ Staff may be exposed to natural hazards
- ☐ Rely on third-parties

- ☐ Staff are trained in hazard response
- ☐ Redundancy in supply chain
- ☐ Staff/vendor communication protocol

5

INVENTORY & STORAGE

Where are the items stored? Are any hazardous?

- ☐ Insecure, outdoor storage
- ☐ Chemicals or hazardous materials
- ☐ Fuel stored on site

- ☐ Outdoor storage is secure
- ☐ Storage elevated
- ☐ Minimal storage

6

SITE UTILITIES & SPECIALIZED EQUIPMENT

Can you operate without utilities? Where are utilities and equipment located?

- ☐ Temporary power supply to site
- ☐ Power lines located near trees
- ☐ Site experiences frequent utility outages

- ☐ Permanent, below ground utilities
- ☐ Backup power (batteries, generators) & fuel
- ☐ Served by municipal water & sewer

7

INSURANCE

Do you have Insurance? Does it cover contents, interruption, or natural disasters?

- ☐ Standard insurance policy
- ☐ Not sure about insurance policy

- ☐ Specialized disaster insurance
- ☐ Business interruption & contents

SELECT RISK REDUCTION STRATEGIES

1

Access

Enable Remote Work

Develop abilities to continue operations and collaborate without site access. Relocate to a site to prepare ready made components.

\$

Mobile Operations

Identify services that can be provided at customer or third-party locations.

\$

2

Documents & Records

Protect Documents and Records

Back up records on the cloud; this will protect them from damage and make them accessible remotely

\$

3

Site

Store Mitigation Materials

Store items on-site such as sand bags to reduce flooding, pre-sized plywood to protect windows, or salt for snow and ice.

\$

Install Flood Walls

Construct flood walls to protect an entire site from flooding. Flood walls may not be permitted in some riverine or coastal flood zones.

\$\$\$

4

Employees & Vendors

Third-Party Vendor Resilience

Identify backup vendors in case a hazard prevents third-party services from operating.

\$

Staff Time Required

No staff time needed

Overtime needed

Within normal operations

Additional staff or help

Relative Cost

\$

Within normal budget

\$\$

Additional capital needed

\$\$\$

Grants may be needed

Space Required

Minimal space needed

Find space on site

Buy or rent more space

4

(Continued)

Employees & Vendors

"Business Continuity Plan"

Develop a business continuity or emergency plan. Identify needs, educate staff, assign responsibilities and perform drills.

"Emergency Communication Protocol"

Develop, share, and practice emergency communication protocols with employees

5

Inventory & Storage

Protect Inventory

Store inventory in protective containers. Raise items on platforms or upper floors. Or remove valuable stock from the site before a storm hits.

Secure Outdoor Inventory

Tie down outdoor inventory with straps. Arrange items so that fragile, valuable items are more protected.

6

Utilities & Equipment

Protect Utilities and Equipment

Raise utilities and equipment above potential flood levels on platforms or upper floors. Use barriers, waterproof, or protect fixed items.

Partial Operations

Provide a degree of service through disruptions to maintain customer loyalty & build goodwill in the community.

Backup Power

Acquire a portable backup generator capable of running equipment during a power outage. Train staff to operate.

Partner with Other Businesses

Partner with another business to briefly store inventory or stage equipment at one-another's sites if either one is compromised.

7

Insurance

Ask About Insurance Coverage

Check with your agent about the specifics of your coverage. See the next page for questions to ask.

CHOOSING INSURANCE

A business is never completely safe from hazards. Insurance helps to protect the time and money you invest in your business against the worst-case scenarios.

Your insurance agent can provide detailed answers to these questions specific to your business.

What is covered by my business insurance policies?

A standard insurance policy may not cover important situations, like damages caused by floods or losses from business interruption. Talk with your agent about different situations that concern you to see if you're protected.

I rent my workspace. What is covered by my landlord's insurance?

A landlord's insurance policy may or may not cover losses incurred by tenants. Ask for a copy of the insurance policy and bring it to your own agent to review.

Does my standard policy cover business interruption?

You may lose business after a storm if power goes out, if roads are blocked, or if you need to close for repairs. Check with your agent whether lost business is covered or if you should purchase a rider to increase coverage.

What about liability and automobile insurance?

Liability and auto insurance are separate from business insurance and flood insurance. Talk to your agent about other policies you may need and what they cover. For example, auto insurance may partially cover your vehicle(s) for hazard events like severe storms.

What is a hurricane deductible?

Some policies include a separate hurricane deductible. Because hurricanes are rare, you pay less monthly. However, if a hurricane does hit, you will pay more before insurance kicks in. A storm must be hurricane-force when it hits Rhode Island for hurricane deductibles to apply. You may have other weather related deductibles (for example wind or hail). Check with your insurance agent to discuss what deductibles you may have and how they apply to other weather related events.

How do I make filing a claim easier?

Have insurance information and current inventory and equipment lists on-hand. Take photos or videos of your business site and inventory now, BEFORE an event occurs. Then, take photographs/video of any damage before clean-up or repairs. DO NOT make permanent repairs until your insurance company inspects the property. Save all receipts, including those from any temporary repairs.

FLOOD INSURANCE

FEMA offers subsidized flood insurance through the National Flood Insurance Program (NFIP). **You do not need to be in a flood zone, nor do you need to own your building, to purchase flood insurance.**

- One inch of water in a building can cause more than \$25,000 in damage.
- Standard insurance typically does not cover flood damage.
- More than 1 in 5 flood claims come from outside high-risk flood zones (and that does not include building owners who were not insured, and therefore could not file claims).
- Flood insurance can pay whether or not there is a Disaster Declaration.
- Disaster assistance must be paid back with interest. The average flood insurance claim is nearly \$30,000 and is not required to be repaid.

Can't I just get Disaster Assistance after a flood?

Disaster Assistance is given as a loan, it is not guaranteed, and it needs to be paid back with interest. It is not meant to make you whole again. Don't only rely on emergency assistance, get flood insurance!

Your insurance agent can provide detailed answers to these questions specific to your business.

How do I get flood insurance?

Flood insurance policies are backed by the National Flood Insurance Program (NFIP). You can get a policy through most insurance agents.

Does flood insurance cover the building or its contents?

Contents and building coverage are separate; contents are not covered unless specifically included. Building coverage includes the structure and foundation, building utilities, and walk-in freezers. Contents coverage includes furniture, fixtures, equipment, and stock.

If my landlord has flood insurance, do I need it too?

The landlord may not provide any coverage or may have only building coverage. A renter can purchase its own flood insurance policy.

What is not covered by flood insurance?

Flood insurance policies do not cover everything or all water-related situations and damages. For example, outdoor assets such as landscaping, decks, or vehicles are not covered. Either is business interruption. Additionally, damage from burst pipes, backed-up municipal sewage, or poor site management is not covered.

How can I lower my premium?

Flood insurance cost is related to the level of flood risk. Risk reduction actions can lower premiums. Your community can also take steps to lower premiums.

My business is not in a flood zone. Do I need flood insurance?

A large percentage of flood damage happens outside of FEMA-designated floodplains. If your business is outside of a FEMA flood zone, flood insurance is generally inexpensive. Assess your risk and talk to your agent to make an informed decision.

Online source for answers to insurance questions and for insurance related inquiries.

STORMTOOLS

<https://stormtools-mainpage-crc-uri.hub.arcgis.com/>
An interactive tool to display storm inundation with and without sea level rise scenarios.

RI Coastal Resources Management Council CRMC)

www.crmc.ri.gov/coastal hazardapp.html
A first step to educate and increase understanding of present and future coastal hazard risks.

Local Government

To identify key staff and contact information visit: www.sos.ri.gov/divisions/civics-and-education/your-government

Municipal Emergency Management Agency

Fire Department (non-emergency)

Floodplain Coordinator

Building Official

Chamber of Commerce

Utility Company (ex. gas or electric)

ADDITIONAL CONSIDERATIONS

Historic Structures

For historic properties, consult the following resources:

- “Keeping History Above Water” - created by the Rhode Island-based Newport Restoration Foundation to help protect historic resources from climate hazards.
www.historyabovewater.org
- FEMA “How-To” Guide #6 (FEMA 386-6) - provides comprehensive guidance to historic property owners.
www.fema.gov/media-library/assets/documents/4317
- Check with your local building official about your specific location. Also, coordinate with the State Historic Preservation Officer and the local Historic District Commission.

Americans with Disabilities Act Compliance

Before implementing a risk reduction project consider how it will affect access for people with physical disabilities. Structural changes may require that additional efforts be taken to maintain ADA compliance. Talk to your local building official about your plans before proceeding.

Elevating Buildings and Pedestrian Access

Elevating a building or installing floodwalls may lead to a loss of visibility or access, affecting your ability to attract customers. Identify protection options that avoid this outcome, and contact your local building official to clarify state and local requirements. Note that some business operations can occur in the lower section of an elevated building on a temporary basis.

What if I Rent?

Businesses that do not own their space can still perform many risk reduction actions, including buying flood insurance, planning and preparing, and performing some minor site alterations. At your next lease renewal, add a provision that rent does not need to be paid if the site is inaccessible or unusable during a hazard event. Discuss property protection with you landlord - they don't want their building empty and their tenants damaged, either!

What Should My Employees Know?

Consider having all employees become certified by ServSafe. Visit www.rifoodssafety.org for more information on the certification program. Employees should also be aware of the proper protocols with any crisis management plans, food safety plans, and other emergency plans that are set in place. It is important that employees understand and are aware of the different requirements, such as storage temperatures and shelf life, of perishables to prevent spoiled food from being served.
