79% Will Research How Their Destination is Managing the Covid-19 Situation
Approximately two-thirds of American travelers have a trip at least tentatively planned for 2020.

Most of these trips are developed to some degree, but room to influence trip decisions clearly exists.

Trip distance thresholds may be further than initially anticipated.

Safety is paramount to their planning and won’t be far for travelers’ minds while on their trips. The availability of destination level information will be important.

KEY TAKEAWAYS

- Travel businesses should not assume their guests are entirely trusting of them to take care of their health right now and should take extra measures to earn this trust.

- Most travelers are not yet convinced that the industry can now safely reopen.

- Rural residents are the least comfortable with tourists, setting up some potential tension if there is increased visitor volume and lack of hygienic behavior.
KEY TAKEAWAYS

- Our predictive indexes show some improvement, but the industry has a long way back.
- There is an unevenness in travel readiness, making understanding your high-potential traveling audiences even more critical.
