Your Guide to Stadiums,
Grandstands and Bleachers

COVER PROJECT

DETAILS

This project is one of several renovations to historic facilities in our brochure. Updates to the 1960 era venue included a stadium seating section and bench seating with backrests. The multi-level pressbox configuration features both sloped and flat fronts. Our Vertical Rail is an excellent substitution for chain link and accentuates the canopies, sides and front of the grandstand. Tiger football and track and field teams call this multi-sport complex home. Manufactured and installed by Southern Bleacher.

Photos: www.proimagesphoto.com

SPECIFICATIONS

Trinity University | San Antonio, Texas

Architect: RVK Architects

14 Rows x 150' | Interlock 2000 decking system

1,110 Seats

Two 8' x 30' pressboxes | Two 8' x 42' canopies

One 8' x 42' pressbox (lower center) | One 14' x 42' pressbox (upper center)

Our massive steel substructure creates the perfect space for concessions, locker rooms and training rooms.

Since 1946, Southern Bleacher has set the standard for high school bleachers, college stadiums, fairgrounds, speedways and more. Fans in every U.S. state and Canada cheer from our grandstands.

With more than three million seats to our name in the past five years alone, no one comes close to our experience. Financially sound with no influence from investors, our customers rest easy knowing we'll be here for decades to come. By not outsourcing our aluminum or steel fabrication, we control both quality and schedule, and a veteran project manager is your single point of contact, your advisor and ally, from your complimentary design through your stadium build and beyond. Our many valuable services include providing seating layouts, building code reviews, budget estimates, plan approval assistance, specifications and technical drawings. No matter the size, scope and type of project – professional, collegiate or a secondary school sports facility, our expertise and dedication to excellence will result in first class stadiums, grandstands and bleachers for your budget. ■

HILLSIDE

SPECIFICATIONS

Albert Lea School District 241 | Albert Lea, Minnesota
 Architect: ISG
 Leg Truss design
 14 Rows x 330' | Interlock 2000 Decking System
 1,751 Seats

DETAILS

The original Albert Lea sports complex was constructed in the 1960s. The deteriorating complex required a renovation to meet the updated needs of all sports teams and spectators. Southern Bleacher's knowledge of ADA accessibility standards guided the District to a more engaging, safer and sustainable facility. With team blue risers and front facade, the new Hammer Field is the home of Tiger football, soccer and track. Note the team blue seat back team bench in front of the grandstand. Manufactured and installed by

Southern Bleacher. Photo: Stebbins Photography

RENOVATION

"The new stands give fans more room and brings them closer to the action, creating a more intimate environment."

"The newly renovated stadium will give the football team a sense of identity as they continue to lay the foundation for their program."

ODU SPORTS

SPECIFICATIONS

Old Dominion University | Norfolk, Virginia
 Architect: Moseley Architects & Populous
 Interlock 2000 decking system
 Camatic Seating Stadium Chairs
 15,424 Total seats

DETAILS

A project of this magnitude is all in a days work at Southern Bleacher. In this case, it took nine months and came in on budget. Virtually all of the old stadium was demolished to make way for new seating and amenities. Renovations included chair seating and bench seating with back rests. New East and West grandstands bring fans closer to the action in typical Southern Bleacher style. Kornblau Field at S.B. Ballard Stadium is the home of Monarch football. Manufactured and installed by Southern Bleacher.

Photo: Gibby Visuals

A Southern Bleacher state-of-the-art pressbox or stadium sky box gives you the opportunity to add individual style to your venue while creating a high-value, functional space for announcers, media and special guests.

Southern Bleacher's state-of-the-art press boxes are an opportunity to individualize a stadium. Press boxes are no longer an afterthought or a necessary addition. A Southern Bleacher press box will make a statement – it is up to you just how bold you want that statement to be. We offer a number of ways to create an individual look for your stadium sky box / press box, allowing you to create exactly the press box you envision: A wide variety of colors for exterior panels. Faux brick, stone and block facades to blend your venue into architectural surroundings or create a unique architectural statement. If you've opted for a roof platform, chain link or vertical rails safety fencing, including options for colored rails or colored vinyl-coated chain link. ■

PRESSBOXES

At Southern Bleacher, we are experts at creating a state-of-the-art pressbox perfectly designed for your venue. With our variety of options, pressbox possibilities are limitless. Southern Bleacher pressboxes come standard with galvanized steel support that is connected to the rear of the stadium and is independently supported by galvanized steel columns and a concrete foundation. Standard features are exteriors of 26-gauge R paneling for strength and durability. Interiors have anodized aluminum counter tops, acoustic ceiling tiles and florescent lighting. From there it is up to you. We offer several window options and interior enhancements for a pressbox as high or as low tech as you please. A venue's pressbox is not only a necessary component, but it can add individuality and personality to any stadium or grandstand. We offer a variety of exterior facade colors (you can download a chart from our website). Faux brick, stone and block facades can blend your venue into architectural surroundings or make a statement. Roof platform options include our Vertical Rail safety fencing in colors and also a colored vinyl-coated chain link. Look at the projects throughout the brochure for inspiration and ideas.

SPECIFICATIONS

Howard University
Washington, DC
Architect: Rashid Architects
14' x 48' 2-Story Pressbox

DETAILS

Interlock 2000 decking system
432 Seats
8' x 36' Pressbox

DETAILS

When CAC came looking for a new ballpark venue, they chose Southern Bleacher. Not to brag, but where else would the home of 42 National Championships go? The mitred grandstand perfectly frames the backstop area, offering incredible sight lines to spectators. The venue is colorful with team green seatbacks and pressbox facade. Team gold step risers and pressbox trim finish the grandstand. Home of Vaqueros baseball and Vaqueras softball. Designed, manufactured and installed by Southern Bleacher.

Photo: Tim Roberts Photography

At Southern Bleacher, we have a history of problem solving!

We understand that it can be disruptive to work with one person throughout the RFP and sales process only to be passed off to someone new when you move into the design phase of your project. At Southern Bleacher, your sales representative is your designer and project manager through fabrication and the on-site build. That continuity is only possible because of the unmatched expertise of our regional representatives – knowledge and experience allows each one of them to not just design your project customized to the requirements of your site but also adapt those designs in a flash if unforeseen issues arise. Bottom line, the first time and every time you contact Southern Bleacher, you've reached someone who can help, without the need to pull in an engineer (most of our reps are engineers) or seek solutions from an architect (we help architects solve problems all of the time). Your representative has not only the experience to solve your challenges but also the authority to make those calls. ■

SPECIFICATIONS

Van Buren Public Schools
Van Buren, Arkansas
10 Rows x 60
Interlock 2000 decking system
256 Band member seats

DETAILS

This simple yet functional band grandstand offers ample room for band members and their instruments. Band grandstands like this one offer deeper treads: room for the band AND their instruments. Note the contrasting step risers. Helpful when navigating steps with a large musical instrument. The roof is practical protection for instruments and uniforms. Having the grandstand in the end zone allows more general and VIP seating on the home side. An added bonus is that the sound of the band in the end zone is a better experience for both the team and fans! The Blakemore Field band grandstand is home to the Pointer Pride Marching Band. Designed, manufactured and installed by Southern Bleacher. *Photo: NWA Photography, Inc.*

Who would have ever thought about a bleacher for the band? Southern Bleacher, that's who. We have been at the forefront of innovation and problem solving since the first bleacher was built in Van Buren in 1946. Our founder, Jim Geurin, a high school band director in Van Buren decided that his school should have bleachers. Together with his friend and school superintendent, Virgil Coleman, the two went about creating that first bleacher and in the process they made history. Every time their school played another team, the coaches and fans left wanting bleachers of their own. Over 70 years later, Southern Bleacher products and word of mouth are our best advertising. You can learn more about the history of Southern Bleacher on our website.

SPECIFICATIONS

Little Rock Southwest High School
 Little Rock, Arkansas
 Architect: Polk Stanley Wilcox Architects, Ltd.
 18 Rows x 300' | Interlock 2000 decking system
