

# June 2025 Data

## Summary

June 2025 saw steady growth over the previous year in several metrics, while down in others. Average occupancy was just above 40%, a 14% YOY increase, with the majority of that growth seen over the weekend of SBT GRVL. The event was previously held in August. ADR continues to pace behind last year, a trend we've seen over the past several months, while RevPAR increased.

Owner, or unpaid, stays continue to be consistent with previous months when compared with total occupancy, which is reflected in total (paid & owner) occupancy, but doesn't contribute to accommodations tax or STR collections.

The data in the following tabs reflects the most current data as of August 5, 2025. Some data takes two to three months to populate.
