The Economic Impact of Tourism in Huntington Beach, California

2018 Analysis
September 2019
1. Introduction
Introduction and definitions

This study measures the economic impact of tourism in the City of Huntington Beach, California. Huntington Beach is the 4th largest city in Orange County with a population just over 200,000. The City offers a stock of nearly 2,500 hotel rooms on 23 properties. Huntington Beach accounts for 6.3% of the County population and about 4.4% of the hotel room inventory.

Key attractions in Huntington Beach include the City’s five public beaches, various shopping options, Huntington Beach Pier, the International Surfing Museum, Huntington Beach Art Center, and nearby regional destinations such as Disneyland and Legoland.

The economic impact of visitors and visitor spending in Huntington Beach is estimated based on survey research conducted by Lauren Schlau Consulting and direct spending estimated by CIC Research. Visitors to Huntington Beach include travelers who came for the day or stayed overnight and were not residents of Orange County or regular commuters. Impacts were measured in terms of business sales, jobs, income, and tax revenues generated.

Visitor spending flows through the local economy and generates indirect benefits through supply chain and income effects.

The total impact of tourism includes direct visitor spending, indirect impacts, and induced impacts. Direct visitor spending creates economic value in specific visitor-related sectors such as lodging, retail, and recreation. This supports a relative proportion of jobs, wages, taxes, and GDP within each sector. Indirect benefits accrue to those sectors that provide goods and services as inputs into production, such as food wholesalers, utilities, and financial or legal services. Induced benefits are generated when employees whose incomes are driven directly or indirectly by tourism, spend a portion of that income in the local regional economy.
2. Key Findings
Huntington Beach key findings

Tourism plays a key role in the Huntington Beach economy.

Huntington Beach visitor volume and spending expanded 7.0% and 13.3% respectively, in 2018. Since 2012, visitor spending growth in Huntington Beach has outpaced that of the state and Orange County overall.

Visitors to Huntington Beach spent $565 million in 2018, which generated a total of $736.4 million in total business sales, including indirect and induced impacts.

Tourism in Huntington Beach generated $91 million in tax revenues, including over $43 million in state and local revenues.

Including direct, indirect, and induced impacts, 6,921 jobs were sustained by visitors to Huntington Beach in 2018, with total income of $253 million.

Approximately 6.4% (1 in 16) of all jobs in Huntington Beach were sustained by tourism.
3. Huntington Beach Tourism Trends
Huntington Beach visitor volume and spending expanded in 2018, driven by employment and income growth in the region’s key source markets, such as Arizona, Washington, Texas, and Nevada, and the rest of California.

An estimated 3.74 million visitors spent $565 million in 2018, increases of 7.0% and 13.3%, respectively, from 2017.

International visitation is estimated at nearly 423,000, accounting for 11.3% of all visitation.

Huntington Beach trends

Demand drove revenues in 2018.

Room supply and demand are roughly balanced in Huntington Beach, although demand growth continues to outpace that of supply. Since 2011 demand has expanded 5.3% per year versus 4.5% annually for supply.

In 2018, both demand and supply expanded robustly, demand at 13.3% and supply at 12.9%. Overall, the balance between demand and supply is reflected in a relatively stable occupancy rate, which ticked up just 0.25 percentage points to 74.3% in 2018.

Both Demand and Supply are Expanding

Sources: STR, Tourism Economics
Note: the above index measures change since January 2011

Since 2011, annual revenue growth has averaged 10.0%, driven roughly evenly between demand and price growth. In 2018, demand accounted for about three-quarters of revenue growth, with higher prices accounting for the rest.

In 2018, the average daily rate was $233.60, up 3.7% from 2017. The higher prices helped to boost revenues 17.5%, the third consecutive year of double-digit growth.

Demand is Driving Revenue Growth

4. Huntington Beach Visitors and Spending
Most visitors to Huntington Beach came for the day and came for leisure.

A total of 3.74 million visitors came to Huntington Beach in 2018.

Nearly 2.9 million visitors, 77.4% of the total, came for the day, while the balance, nearly 850,000 visitors, or 22.6%, stayed overnight.

International visitors amounted to 423,000 in 2018, accounting for 11.3% of total volume.

Most visitors to Huntington Beach came for leisure (92.7%), and 7.3% came for business.

Huntington Beach Visitor Characteristics

Sources: Lauren Schlau Consulting, CIC Research, Tourism Economics
Visitor spending on food and beverages amounted to $234 million and accounted for the greatest share of the total, followed by lodging at $153.4 million, retail at $107.8 million, and recreation at $23.9 million.

In terms of shares, food and beverage together with lodging accounted for more than 71% of total spending, followed by retail at nearly 20%, and recreation at 4.4%.
Visitor spending trends

Visitor spending on lodging and food and beverages led spending growth.

Total visitor spending expanded 13.3% in 2018, faster than growth of a year earlier.

Spending growth among the key categories was led by lodging at 17.3%, followed by food and beverage at 13.8%, and recreation at 13.5%,

Visitor spending on local ground transportation was up 12.2%, driven in part by nearly 19% higher gas prices versus a year earlier.

7. Data Sources and Methods
Why quantify the tourism economy?

- By monitoring tourism’s economic impact, policy makers can make informed decisions regarding the funding and prioritization of tourism development.
- It can also carefully monitor its successes and future needs.
- In order to do this, tourism must be measured in the same categories as other economic sectors – i.e. tax generation, employment, wages, and gross domestic product.

Why is this a challenge?

- Most economic sectors such as financial services, insurance, or construction are easily defined within a region’s economic statistics.
- Tourism is not so easily measured because it is not a single industry. It is a demand-side activity which affects multiple sectors to various degrees.
- Tourism spans nearly a dozen sectors including lodging, recreation, retail, real estate, air passenger transport, food & beverage, car rental, taxi services, travel agents, museums, and theme parks.
Methods and data sources

Estimates of direct visitor expenditures in Huntington Beach were based on several sources including:

- Visitor volume and spending estimates from survey research conducted by Lauren Schlau Consulting and direct spending estimates developed by CIC Research, a travel research firm based in San Diego, CA.
- Data covering hotel room demand, supply, revenues, occupancy, and room rates in Huntington Beach from STR.
- Industry data on employment, wages and sales from the U.S. Census, the Bureau of Economic Analysis, and the Bureau of Labor Statistics.
- Local bed tax data for the City of Huntington Beach.
- Sales tax revenues for all municipalities obtained from the California State Board of Equalization (BOE).

An IMPLAN input-output model was constructed for Orange County. The model traces the flow of visitor-related expenditures through the local economy and their effects on employment, wages, and taxes. IMPLAN also quantifies the indirect (supplier) and induced (income) impacts of tourism. Tourism Economics then cross-checked these findings with employment and wage data for each sector to ensure the findings are within reasonable ranges. Adjustments were made to city level modeling results in order to capture indirect and induced economic impacts only in the relevant geographic areas.

Gasoline price data for the Los Angeles region were obtained from the Energy Information Administration and the Bureau of Labor Statistics CPI database.
About Tourism Economics

Tourism Economics is an Oxford Economics company with a singular objective: combine an understanding of tourism dynamics with rigorous economics in order to answer the most important questions facing destinations, developers, and strategic planners. By combining quantitative methods with industry knowledge, Tourism Economics designs custom market strategies, destination recovery plans, tourism forecasting models, tourism policy analysis, and economic impact studies.

With over four decades of experience of our principal consultants, it is our passion to work as partners with our clients to achieve a destination’s full potential.

Oxford Economics is one of the world’s leading providers of economic analysis, forecasts and consulting advice. Founded in 1981 as a joint venture with Oxford University's business college, Oxford Economics enjoys a reputation for high quality, quantitative analysis and evidence-based advice. For this, its draws on its own staff of 30 highly-experienced professional economists; a dedicated data analysis team; global modeling tools, and a range of partner institutions in Europe, the US and in the United Nations Project Link. Oxford Economics has offices in London, Oxford, Dubai, Philadelphia, and Belfast.
