## INTRODUCTION

# PROJECT BACKGROUND

The travel sector is an integral part of Hillsborough County economy. Visitors generate significant economic benefits to households, businesses, and government alike and represent a critical driver of the County's future. In 2023, visitor-supported business sales reached \$8.9 billion, including indirect and induced impacts.

By monitoring the visitor economy, policymakers can inform decisions regarding the funding and prioritization of the sector's development. They can also carefully monitor its successes and future needs. This is particularly true for Hillsborough County as it builds upon its visitor economy.

## METHODOLOGY AND DATA SOURCES

An IMPLAN input-output model was constructed for Hillsborough County. The model traces the flow of visitor-related expenditures through the local economy and their effects on employment, wages, and taxes. IMPLAN also quantifies the indirect (supplier) and induced (income) impacts of tourism. Tourism Economics then cross-checked these findings with employment and wage data for each sector to ensure the findings are within reasonable ranges.

Visitors included those who stayed overnight or traveled more than 50 miles to the destination.

The primary source of the employment and wage data is the Regional Economic Information System (REIS), maintained by the Bureau of Economic Analysis.

This is more comprehensive than Bureau of Labor Statistics (ES202/QCEW) data because sole-proprietors do not require unemployment insurance and are not counted in the ES202 data.

By establishing a timeline of economic impacts, the industry can track its progress.

To quantify the economic significance of the tourism sector in Hillsborough County, Tourism Economics has prepared a comprehensive model detailing the far-reaching impacts arising from visitor spending. The results of this study show the scope of the travel sector in terms of direct visitor spending, as well as the total economic impacts, jobs, and fiscal (tax) impacts in the broader economy.

The analysis draws on the following data sources:

- Florida Department of Revenue: sales tax and gross sales data by industry for Hillsborough County
- Hillsborough County: tourist development tax data
- Bureau of Economic Analysis and Bureau of Labor Statistics: real estate taxes paid, employment and wage data, by industry
- STR: lodging performance data, including room demand, room rates, occupancy, and room revenue, for hotels
- Tourism Economics, Global City Travel database: International arrivals and spending data for Tampa-St. Pete
- United States Census Data: data on second homes and 2017 Economic Census
- Bureau of Transportation Statistics: TPA airport passenger data
- EIA: Gas Prices for Florida region
- Near: geolocation data
- Attraction Data: sports and theme park visitor data

# ECONOMIC IMPACTS KEY FINDINGS

## VISITOR SPENDING

Visitor spending achieved continued growth, reaching \$5.7 billion, a 5% increase over the prior year.

## TOTAL VISITORS

Hillsborough County welcomed nearly 27 million visitors in 2023, including 16 million day visitors and 11 million overnight visitors.

**27 MILLION**

Total Visitors to Hillsborough County in 2023

## TOTAL ECONOMIC IMPACT

Direct visitor spending of \$5.7 billion generated a total of \$8.9 billion in total business sales. This total economic impact sustained 59,329 jobs and generated \$535 million in state and local tax revenues in 2023.

## Visitor Economy Trends

The Hillsborough County visitor economy saw continued growth in 2023, supported by visitor growth, increased lodging prices, and modest growth in other spending categories. Hotel revenues exhibited continued growth which can largely be attributed to price growth.

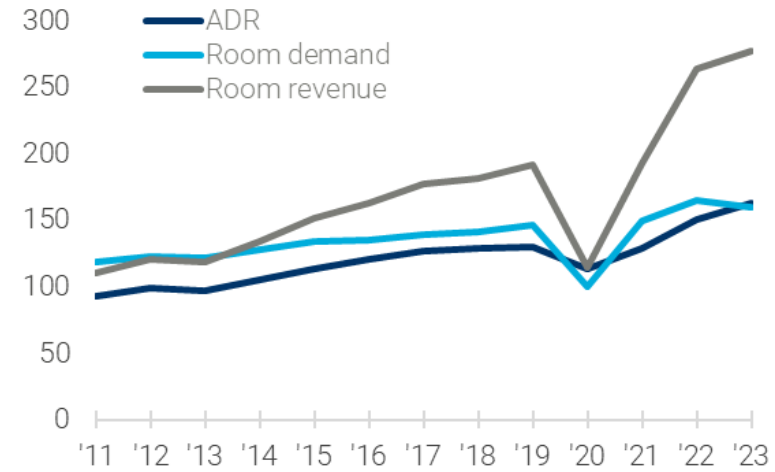

### Hotel Sector

#### Growth in 2023

Hotel room revenues grew 5% in 2023. Revenue continued to grow amid declining room demand, largely a result of an 8% increase in ADR.

#### Key Hotel Indicators in Tampa

Index (2009=100)

Source: STR, Tourism Economics

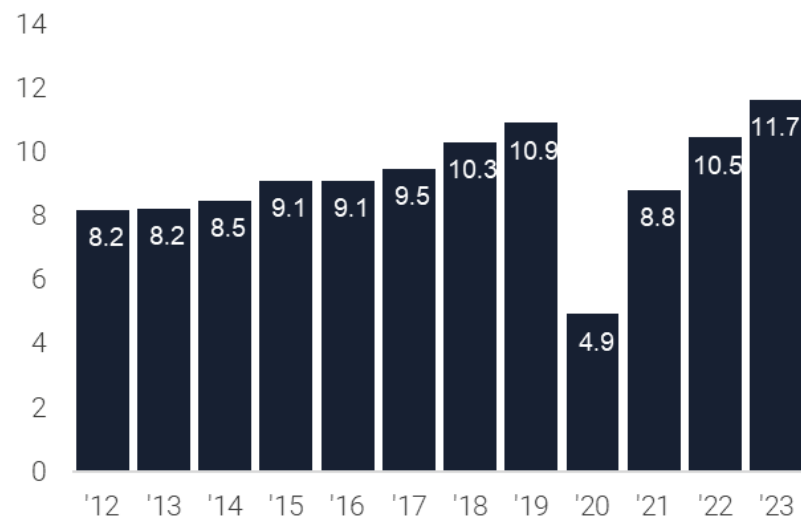

### Air Travel

#### High spending travelers are returning

Inbound passenger travel increased 11%, surpassing pre-pandemic levels for the first time. Both domestic and international inbound passengers fully recovered in 2023 with domestic arrivals leading.

#### Inbound passenger arrivals

Million inbound to TPA

Source: BTS, Tourism Economics

### Consumer Prices

#### Visitors faced price increases in 2023

Visitors to Tampa faced increasing prices in each of the five major spending categories in 2023 except gasoline. Gasoline prices experienced a 10% decrease while transportation, excluding gasoline, was flat. Food away from home saw the largest increase in prices with 9% growth.

#### Travel-related CPI in the Tampa region

Year-on-year % price growth

# Visits & VISITOR SPENDING

Hillsborough County visitor spending showed modest growth in 2023 as visitors spent \$5.7 billion in 2023, an increase of 5% that pushed spending 28% above 2019 levels. With all spending categories now fully recovered, growth has moderated but remains steady as price increases and demand increases supported spending growth.

## Visitor Volumes

### Growth in 2023

Visitor volumes increased 0.7% in 2023, or almost 200 thousand visitors. With this increase, volumes reached 10% above of 2019 levels.

## VISITOR SPENDING

**Visitors to Tampa spent \$5.7 billion across a wide range of sectors in 2023.**

Of the \$5.7 billion spent in Tampa in 2023 by visitors, spending on food and beverage accounted for \$1.6 billion, 28% of each visitor's budget.

Lodging, including the value of second homes, resulted in \$1.3 billion, 23% of visitor spending.

Recreation spending accounted for \$1.2 billion or 21% of visitor spending.

Transportation, including both air and transportation within the destination, registered \$1.0 billion, 17% of visitor spending.

Retail captured 11% of visitor spending.

\*\*Transportation includes spending on air transportation

## Visitor Volume & Spending Trends

Visitor spending increased 5% in 2023 following significant growth in 2022. Spending grew across all sectors, driven by increases in prices and slight demand increases. Among all spending categories, growth in transportation, predominantly driven by air transportation, was especially notable in 2023. Food and beverage spending showed strength, too, increasing 6%. Conversely, visitor spending on retail goods has lagged, and remained below other spending categories both in terms of year-over-year growth and relative to 2019.

## Visitor Volumes & Spending Trends

International visitors continued to have strong growth in 2023, increasing 49%. Despite strong growth, the international market remains at 88% of 2019 levels. While the international market represents only a small share of visitor volume, per-trip spending by international visitors is significantly higher than per-trip spending by domestic visitors.

## Visitor Volumes

Domestic visitor volumes continued to increase in 2023, growing 0.2% over the prior year (excluding international visitors). Visitors with the purpose of seeing friends and family drove 2023 visitor growth with 1.6% growth. Marketable leisure travel and business travel declined 0.7% and 1.5%, respectively.

## ECONOMIC IMPACT METHODOLOGY

The analysis of the Hillsborough County visitor economy begins with direct visitor spending and analyzes the downstream effects of this spending on the broader economy. To determine total economic impact, we input direct spending into a model of the Hillsborough County economy, constructed using an IMPLAN input-output (I-O) model. The model traces the full extent of industry impacts as dollars flow through the local economy.

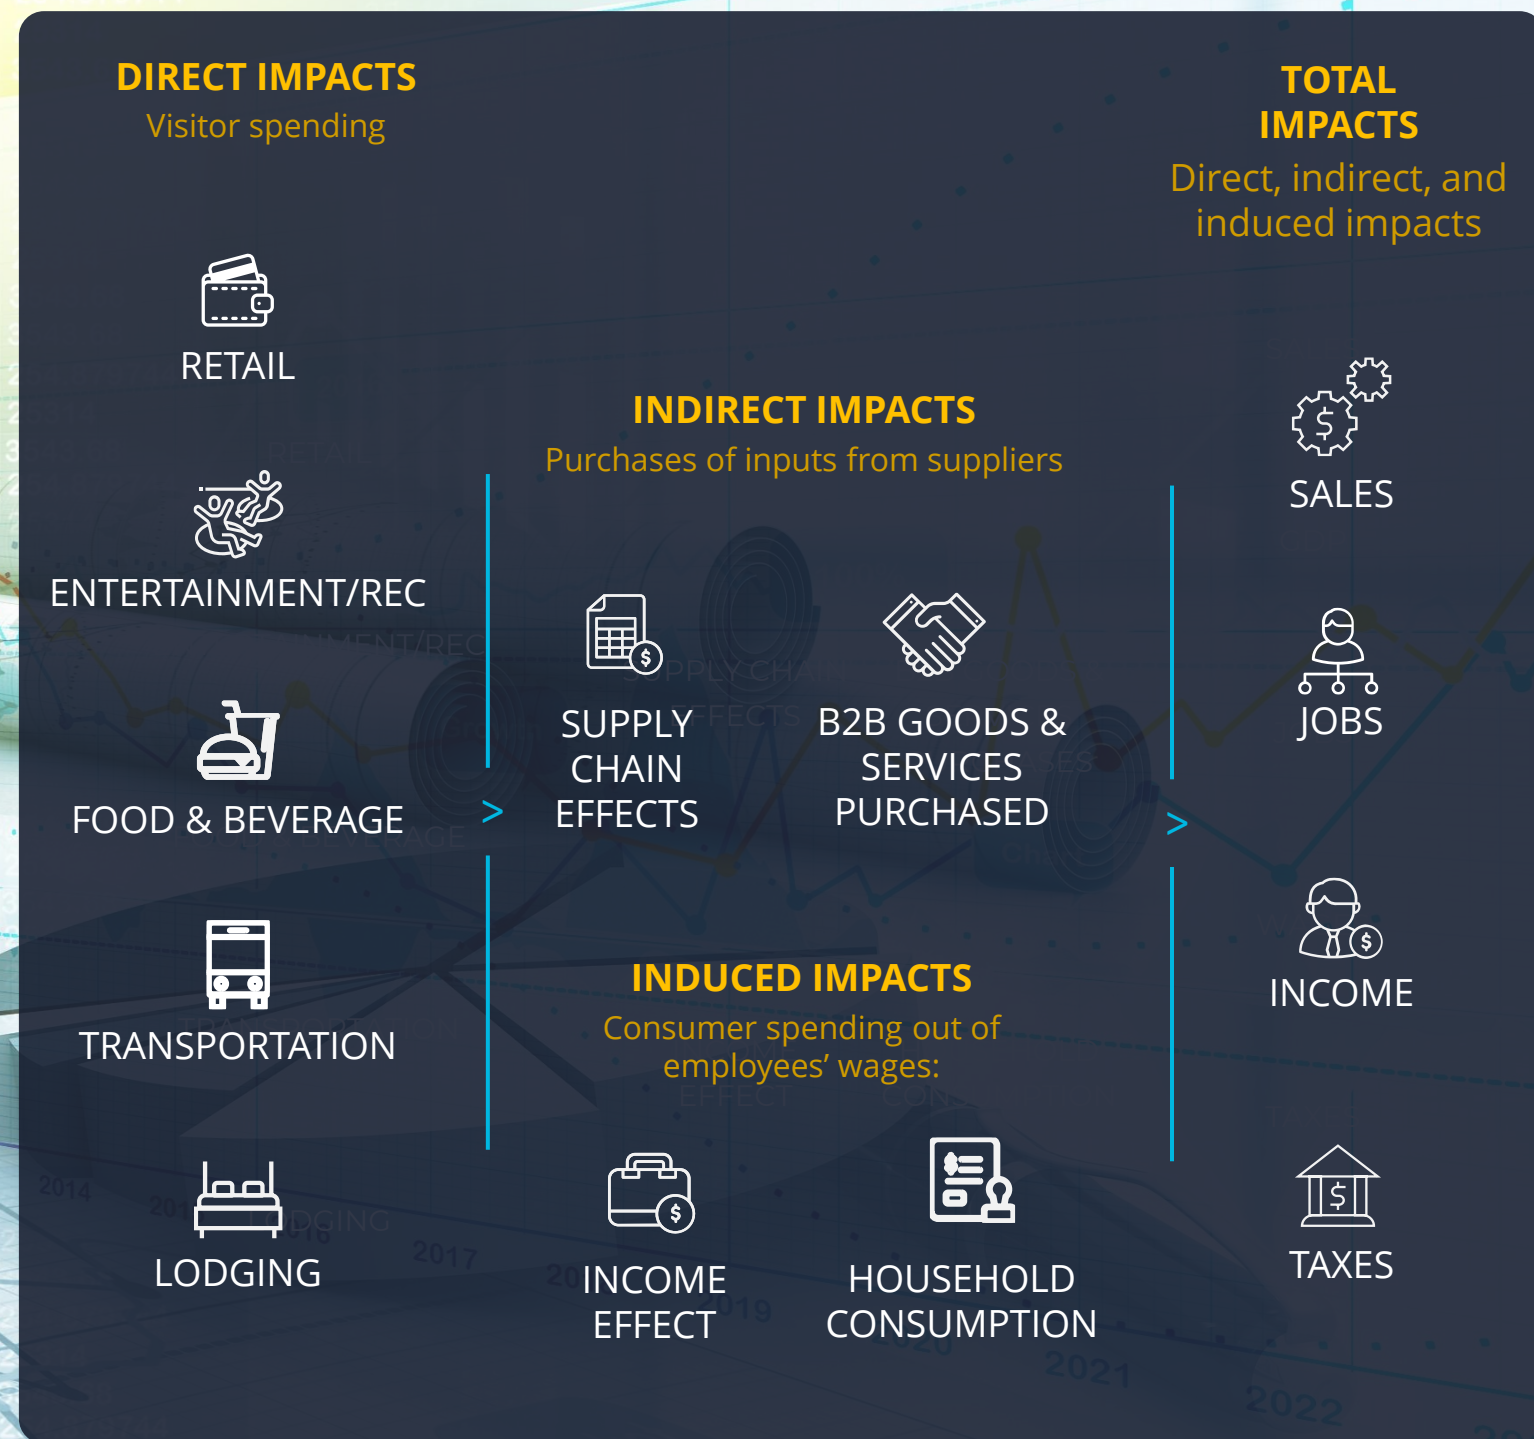

An I-O model represents a profile of an economy by measuring the relationships among industries and consumers and quantifies three levels of impact:

- 1. Direct impacts:** Visitor spending creates direct economic value within a discrete group of sectors (such as recreation and transportation). This supports a relative proportion of spending, jobs, wages, and taxes within each sector.
- 2. Indirect impacts:** Each directly affected sector also purchases goods and services as inputs (e.g. food wholesalers, utilities) into production. These impacts are called indirect impacts or supply-chain effects.
- 3. Induced impacts:** Lastly, the induced impact is generated when employees whose wages are generated either directly or indirectly by visitor spending spend those wages in the local economy. This is called the induced impact or income effect.

The Tourism Economics model calculates these three levels of impact - direct, indirect and induced - for a broad set of indicators, including:

- Spending
- Wages
- Employment
- Federal Taxes
- State Taxes
- Local Taxes

## ECONOMIC IMPACT FRAMEWORK

# ECONOMIC IMPACT FINDINGS

## DIRECT EMPLOYMENT

Direct visitor-supported employment expanded 3% in 2023, reaching 2% above pre-pandemic levels of employment and surpassing pre-pandemic levels.

## ECONOMIC IMPACT FINDINGS

### FISCAL (TAX) IMPACTS

Visitor spending generated over \$1.3 billion in government revenues in 2023.

State and local taxes alone tallied \$535 million in 2023.

Each household in Hillsborough County would need to be taxed an additional \$955 to replace the visitor-generated taxes received by state and local governments in 2023.

#### Fiscal (tax) impacts

Amounts in \$ millions

	Direct	Indirect & Induced	Total
<b>Total Tax Revenues</b>	<b>\$877</b>	<b>\$412</b>	<b>\$1,289</b>
<b>Federal Taxes</b>	<b>\$484</b>	<b>\$270</b>	<b>\$754</b>

# ECONOMIC IMPACTS IN CONTEXT

**\$5.7B**  
**VISITOR**  
**SPENDING**

The \$5.7 billion in visitor spending is enough to pay every rostered player on the Tampa Bay Buccaneers' annual salary more than 40 times.

**\$3.1B**  
**LABOR**  
**INCOME**

The \$3.1 billion in total income generated by tourism is the equivalent of over \$5,500 for every household in Hillsborough County.

**59,329**  
**TOTAL**  
**JOBS**

If every visitor-supported employee in Tampa were in one place it would be enough to fill Tropicana Field 1.4 times.

**\$535M**  
**STATE & LOCAL**  
**TAXES**

The \$535 million in state and local taxes generated by tourism would cover the average salaries of almost 11,000 public school teachers in Tampa.

# APPENDIX B: DEFINITIONS

## Glossary – Spending Definitions

Term	Description
<b>Lodging</b>	Includes visitor spending in the accommodation sub-sector. This includes food and other services provided by hotels, rentals and similar establishments.
<b>Food and beverage</b>	Includes all visitor spending on food & beverages, including at restaurants, bars, grocery stores and other food providers.
<b>Recreation</b>	Includes visitor spending within the arts, entertainment and recreation sub-sector.
<b>Shopping</b>	Includes visitor spending in all retail sub-sectors within the local economy.
<b>Local transport</b>	Includes visitor spending on local transport services such as taxis, limos, trains, rental cars, buses, and the local share of air transportation spending.
<b>Service stations</b>	Visitor spending on gasoline.
<b>Second homes</b>	Where applicable, spending associated with the upkeep of seasonal second homes for recreational use as defined by the Census Bureau.

## Glossary – Economic Impact Definitions

Term	Description
<b>Direct Impact</b>	Impacts (business sales, jobs, income, and taxes) created directly from spending by visitors to a destination within a discreet group of tourism-related sectors (e.g. recreation, transportation, lodging).
<b>Indirect Impact</b>	Impacts created from purchase of goods and services used as inputs (e.g. food wholesalers, utilities, business services) into production by the directly affected tourism-related sectors (i.e. economic effects stemming from business-to-business purchases in the supply chain).
<b>Induced Impact</b>	Impacts created from spending in the local economy by employees whose wages are generated either directly or indirectly by visitor spending.
<b>Employment</b>	Jobs directly and indirectly supported by visitor activity (includes part-time and seasonal work). One job is defined as one person working at least one hour per week for fifty weeks during the calendar year.
<b>Labor income</b>	Income (wages, salaries, proprietor income and benefits) supported by visitor spending.
<b>Value Added (GDP)</b>	The economic enhancement a company gives its products or services before offering them to customers.
<b>Local Taxes</b>	City and County taxes generated by visitor spending. This includes any local sales, income, bed, usage fees, licenses and other revenues streams of local governmental authorities – from transportation to sanitation to general government.
<b>State Taxes</b>	State tax revenues generated by visitor spending. This will include sales, income, corporate, usage fees and other assessments of state governments.

# ABOUT TOURISM ECONOMICS

Tourism Economics is an Oxford Economics company with a singular objective: combine an understanding of the travel sector with proven economic tools to answer the most important questions facing our clients. More than 500 companies, associations, and destination work with Tourism Economics every year as a research partner. We bring decades of experience to every engagement to help our clients make better marketing, investment, and policy decisions. Our team of highly-specialized economists deliver:

- Global travel data-sets with the broadest set of country, city, and state coverage available
- Travel forecasts that are directly linked to the economic and demographic outlook for origins and destinations
- Economic impact analysis that highlights the value of visitors, events, developments, and industry segments
- Policy analysis that informs critical funding, taxation, and travel facilitation decisions
- Market assessments that define market allocation and investment decisions

Tourism Economics operates out of regional headquarters in Philadelphia and Oxford, with offices in Belfast, London, Frankfurt, Ontario, and Sydney.

Oxford Economics is one of the world's foremost independent global advisory firms, providing reports, forecasts and analytical tools on 200 countries, 100 industrial sectors and over 3,000 cities. Our best-of-class global economic and industry models and analytical tools give us an unparalleled ability to forecast external market trends and assess their economic, social and business impact. Headquartered in Oxford, England, with regional centers in London, New York, and Singapore, Oxford Economics has offices across the globe in Belfast, Chicago, Dubai, Miami, Milan, Paris, Philadelphia, San Francisco, and Washington DC, we employ over 600 full-time staff, including 300 professional economists, industry experts and business editors—one of the largest teams of macroeconomists and thought leadership specialists.
