ABOUT THE LOGO

As skaters, officials and fans are welcomed to Wichita, Kansas, the heart of the country, the theatrical tie to The Wizard of Oz was a natural addition to this year's 2022 National Theatre on Ice Competition logo.

Forever linked with Kansas, the The Wonderful Wizard of Oz was a classic children's book written by L. Frank Baum. Published in 1900, it became an instant success.

For generations, The Wizard of Oz, the 1939 MGM fantasy musical, has held a cherished place in American popular culture. It tells the story of Dorothy Gale, a Kansas farm girl transported to the magical Land of Oz. There, she meets the Scarecrow, who wants a brain; the Tin Man, who desires a heart; and the Cowardly Lion, who lacks courage.

These beloved characters were incorporated into this year's logo as a nod to theater and symbol of Kansas as the proud location of this competition. This graphic, along with the whimsical typography are cohesive elements of the logo meant to invoke a spirit of fun and theatrics, as well as welcome all guests to Wichita.

ABOUT THEATRE ON ICE

Theatre On Ice consists of two programs: The Free program and the Choreographic Exercise (CE), which is similar to a short program in singles and pairs skating. At the Theatre On Ice National Competition both segments are performed.

Theatre On Ice uses all aspects of figure skating to incorporate a theme, emotion or story enhanced by music. It is a package that includes five dimensions: Theme, Music/Sound, Choreography/Skating Movements, Performance and Costuming/Sets and Props.

- The quality of the Theatre On Ice performance requires the music, theme, and choreography to be consistent with one another and give the feeling of harmony and balance. No singular type of element should dominate the performance. The goal is to transcend the literal and to create emotion.
- Theatre On Ice should utilize the following: Quality of gliding and edges, speed, ease, and amplitude of movements. It must also look for the proper treatment of groups, and for a good variety in the use of the different elements of skating. The quality of edge, speed, ease, and flow of movement should enhance the performance and there should be a balanced incorporation of groups.
- The performance should be an original work or an interpretation of an existing work. The music, costumes and scenery should be used to enhance the overall performance.
- Technical elements are defined as jumps, spins, lifts, steps, or edge elements performed by at least three skaters.
- There is no limit to the number of free skating, pairs, ice dance or synchronized skating elements used in the program; however, judges will evaluate the congruency of all elements used to enhance the chosen theme and music. Programs containing overuse of technical elements without relationship to music, theme, story, or other skaters for the sole purpose of increasing the technical mark will be negatively reflected in the judges' marks.
