

# From the Depths of the Earth to Outer Space

**Start Date: Monday, September 9, 2019**

**End Date: Wednesday, September 11, 2019**

**Arrival Airport: Eisenhower National Airport (ICT);  
no later than 12pm**

**Activity Level: Easy**

**Number of Journalists: 6**

Go 650 ft. below the earth's surface to the Strataca, the only museum in the Western Hemisphere located within a working salt mine. More than mere museum, it's an adventure, as well as having biggest film storage facility in the world for Hollywood Studios. Then explore outer space at the Cosmosphere and Space Center, one of the most significant collections of space artifacts in the world, including the actual Apollo 13 command module, plus IMAX and interactive exhibits. This is a blast from the past for those of you who remember the original space explorations. We'll also enjoy a little bit of Amish country where horse and buggies are intermingled with cars and trucks. Rest assured, we won't forget to treat you to a freshly-made delicious cinnamon roll at the local bakery. You'll finish this tour at a Bison Ranch (because if you come to Kansas then you definitely need to visit a herd of bison.)

There's No Place Like  
**Kansas**
