

Staying Safe at Century II

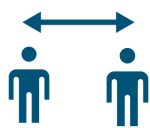

Cloth masks are recommended for all attendees. Staff will wear masks, gloves and safety goggles. Disposable masks will be available onsite. We encourage visitors to the facility to bring their own mask to ensure personal comfort while onsite.

Hand sanitizer stations will be available throughout the event area. We have ordered additional touchless hand sanitizer stations. Stations will be plentiful throughout exhibit and common areas.

Electrostatic sprayers will be used to disinfect the facility after every event. Staff will disinfect all utilized areas of the facility at the conclusion of the event. Staff will also disinfect common areas of the facility and high touch surfaces on a daily basis.

Attendance will be limited based on social distancing guidelines. Floor markers will be used to note social distancing at concession stand, ticketing, and entry lines. Entry and exit points will be limited in order to maintain an accurate head count.

Larger aisles and one-way aisles will be used in exhibit areas. This will prevent attendees from crossing paths and bumping into one another.

Sessions will be set to distance chairs and people based on social distancing guidelines.

Only two exhibitors will be allowed per 10x10 booth space. This allows enough space for attendees to visit exhibitors and maintain social distancing.
