PHOTO TIPS FOR SOCIAL MEDIA

Resolution

Higher quality images are always preferred on social media.

FACEBOOK: Feed/ad: 1200x628px
Story: 1080x1920px
Event: 1920x1080px

INSTAGRAM: Standard: 1080x1080px
Story: 1080x1920px

X: Feed: 1024x512px

TIKTOK: HD Video: 1080x1920px

Composition

Make the image about the subject: Props are welcome, but don't let them take over an image.

- Start with the subject and then consider what more to add to give the photograph more action.
- Double check that everything in the frame is what you intend to photograph.
- Remove extras like sheets, towels, brand labels, etc.
- Fill the frame: Make the most of the space that you have with the subject.
- Try different angles: Depending on the subject, it might photograph best above or to the side.
- Don't be afraid to get in odd positions for the right shot, holding the subject in the air or crouching on the ground.
- Consider backgrounds and look around for other places to put your subject to match the aesthetic.
- Do not use zoom features to compose an image as it will likely come out pixelated; always move yourself to get your lens closer to the subject or crop the photo later.

Lighting

Good lighting will make a subject more appealing.

- Use natural light when possible.
- When using a smartphone, simply use night mode photography settings.
- Do not use flash; it will create harsh highlights and deep shadows.
