

Hamilton County Tourism Conservation Program

Supporting conservation projects that enhance visitor experiences while protecting Hamilton County's natural resources.

WHAT WE DO

Partner with local attractions and organizations to identify, support, and implement conservation projects such as native plant and pollinator gardens, tree plantings, erosion control, landscaping, habitat restoration.

HOW IT WORKS

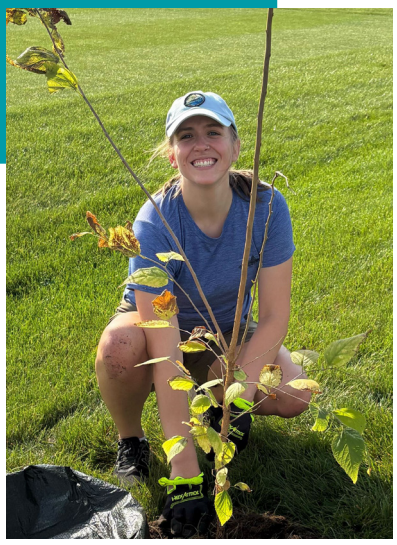

STEP ONE: Identify Opportunity
Attractions or partners express interest or are identified by HCT.

STEP TWO: Site Assessment
HCT collaborates with area experts to evaluate needs.

STEP THREE: Project Planning & Funding
Projects may be supported through HCT's conservation partnership grant or guided to additional funding opportunities.

STEP FOUR: Implementation
Local, qualified partners complete the work of qualifying projects.

STEP FIVE: Ongoing Maintenance
Partners commit to maintaining the improvements for long-term impact.

WHO IS ELIGIBLE?

Tourism-related attractions, public spaces, and community partners in Hamilton County that:

- Serve or impact visitors
- Have an identified conservation need
- Are willing to participate in planning and commit to long-term maintenance

WHY THIS WORK MATTERS

- Enhances visitor experience (shade, beauty, etc)
- Protects natural resources that tourism depends upon (clean air, water and soil)
- Strengthens Hamilton County's reputation as a responsible destination
