

Invasion OF THE plant snatchers!

Our farm at Historic Barns Park has invaders, and we need your help! Below are the invasive species that we have identified on the SEEDS farm. Grab a trash bag and help us do some clean up of invasive species and other trash. After you've identified, pulled plants or gathered trash, place them in a bag, tie it up, and dispose of it in a nearby trash can. Each participant will post a photo of the removal process on social media with the hashtag #GreenForGoodInTC & tag us at @SEEDSTC. Not into invasive species? Everything counts from trash cleanup to trail maintenance. With each photo, Traverse City Tourism will make a donation to help SEEDS and other local nonprofits keep Northern Michigan a beautiful place.

Everlasting pea

Canada Thistle

*Wear gloves

Bindweed

Bronze Fennel

Spotted Knapweed

Alkanet
